**Lead Azure DevOps Engineer with 10+ years of enterprise delivery, cloud infrastructure, automation, and production support experience.** Builds Azure DevOps pipelines, Python automation, and Bicep infrastructure, with hands-on AWS provisioning and application delivery. Experienced in certificate lifecycle management, secure credentials, encrypted database connections, and root cause analysis. Partners with engineering teams to improve release verification, recovery planning, and operational readiness.

## CERTIFICATIONS

Microsoft Certified: Azure DevOps Engineer Expert

Microsoft Certified: Azure Fundamentals

GitLab Certified Associate

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

## AZURE DEVOPS & SOFTWARE DELIVERY HIGHLIGHTS

- Cloud Automation** Developed Python automation and reusable Azure and AWS infrastructure workflows to support provisioning, release checks, and operational troubleshooting.
- Secure Azure Operations** Combined infrastructure automation, credential controls, certificate management, and monitoring to strengthen release readiness and production support.
- Delivery Engineering** Built reusable CI/CD workflows for application and database releases with code reviews, environment approvals, validation, and recovery planning.

## CORE TECHNOLOGIES

### SECURITY & CONNECTIVITY

Azure Key Vault, certificates and renewal, TLS database connections, credential management, Entra ID, managed identities, RBAC, private endpoints

### AZURE DEVOPS & CI/CD

Azure Pipelines, YAML templates, Azure Repos, Azure Artifacts, Git, pull requests, build agents, environments, approvals, deployment verification

### OBSERVABILITY & TROUBLESHOOTING

Azure Monitor, Log Analytics, Application Insights, Prometheus, Grafana, Splunk, ELK, incident diagnosis, root cause analysis, runbooks

### ENGINEERING QUALITY & GOVERNANCE

SonarQube, JFrog Xray, code reviews, automated tests, release evidence, security documentation, technical knowledge sharing, recovery planning

### SOFTWARE & AUTOMATION

Python, PowerShell, Bash, C#.NET, Java, REST APIs, FastAPI, Azure CLI, MSBuild, Maven, JSON, YAML

### AWS CLOUD & OPERATIONS

AWS, EC2, S3, IAM, VPC, EKS, CloudWatch, CloudTrail, Terraform, CloudFormation, AWS CLI, private networking

### AZURE INFRASTRUCTURE AS CODE

Bicep modules and parameters, validation, what-if reviews, ARM templates, Terraform, Ansible, virtual networks, compute, storage

### CONTAINERS & PLATFORMS

AKS, Azure Container Registry, Docker, Kubernetes, Helm, ArgoCD, Linux, Windows Server, environment configuration

## PROFESSIONAL EXPERIENCE

### Lead Azure DevOps Engineer | AT&T Services Inc.

08/2023 - Present

**Skills Used:** Azure DevOps, Python, AWS, Bicep, Key Vault, Azure SQL, AKS, PowerShell

- Built and maintained Azure DevOps CI/CD pipelines for application, database, and infrastructure releases, coordinating dependencies, environment approvals, and deployment verification.
- Automated AWS application delivery with CodePipeline and Python/Bash workflows, integrating deployment checks, secure service connectivity, and production troubleshooting.
- Implemented Azure infrastructure as code with Bicep modules and parameter files, incorporating validation and what-if reviews into controlled pipeline deployments.
- Troubleshoot application, infrastructure, pipeline, and data failures using Azure Monitor, deployment logs, and execution history; documented root causes and recovery procedures.
- Developed Python, PowerShell, and Bash automation for release checks, service integrations, database connectivity validation, and operational support.
- Coordinated schema changes, application compatibility checks, smoke tests, and rollback planning with development, QA, and data engineering teams.
- Managed certificate renewals and credential updates and configured encrypted SQL Server and Azure SQL connections, troubleshooting certificate trust, TLS, and authentication failures.
- Integrated Azure Key Vault, federated pipeline authentication, and least-privilege deployment access to protect credentials used by application and data workflows.
- Produced deployment evidence, environment specifications, and operational documentation to support security reviews, release decisions, and team knowledge transfer.
- Established Git branch protections, required reviews, merge controls, and versioned artifacts to improve code quality and release traceability.
- Provisioned and managed AWS infrastructure using Terraform, supporting EKS workloads, IAM controls, private networking, and consistent environment configuration.

## Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

**Skills Used:** Azure DevOps, Git, Docker, Kubernetes, Jenkins, PowerShell

- Maintained separate development, QA, and production configuration and coordinated application and database releases with engineering teams.
- Improved release reliability through secure runner practices, image validation, branch controls, and documented troubleshooting procedures.
- Supported .NET and Java delivery workflows with versioned artifacts, source-control reviews, container packaging, and deployment verification.
- Built reusable CI/CD stages for Azure-hosted applications, standardizing build-agent configuration, automated validation, environment settings, and release checks.
- Administered Linux and Windows build agents and Kubernetes workloads, diagnosing pipeline, dependency, credential, and runtime failures.

## Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

**Skills Used:** Azure, Terraform, ARM templates, AKS, Python, Azure Monitor

- Built GitHub Actions and Jenkins pipelines for Azure application and database releases, coordinating service rollout and post-deployment validation.
- Used Azure Monitor, Log Analytics, and pipeline telemetry to investigate deployment delays, infrastructure failures, and application connectivity issues.
- Developed Python, Bash, and PowerShell automation for release checks and operational tasks, publishing versioned artifacts for repeatable deployments.
- Partnered with distributed engineering teams to resolve release blockers, improve delivery documentation, and strengthen production readiness.
- Provisioned Azure infrastructure through Terraform and ARM templates and deployed containerized services to AKS using Helm and ArgoCD.

## Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

**Skills Used:** Azure, Jenkins, FastAPI, JFrog, Terraform, AKS, Prometheus

- Delivered CI/CD automation for SaaS and payment-platform workloads, aligning application releases, database dependencies, and Azure infrastructure changes.
- Developed Python FastAPI integrations for Jenkins, Jira, and JFrog to automate project onboarding and reduce manual release coordination.
- Built Terraform modules for Azure networking and AKS and used Prometheus, Grafana, and Ansible automation to support operational diagnosis.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray and maintained shared libraries for consistent artifact versioning.
- Standardized build, test, artifact publication, and promotion workflows with SonarQube and secure secrets handling.

## Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

**Client:** Mercedes-Benz Research & Development India

**Skills Used:** Azure, Jenkins, ARM templates, Ansible, PowerShell, Helm

- Managed Key Vault integration and secure database connectivity and coordinated release configuration and verification with developers and QA.
- Built Jenkins and Maven delivery pipelines for REST microservices across test, security-validation, UAT, and production environments.
- Packaged Kubernetes services with Helm and used ELK, Azure Monitor, and Log Analytics to troubleshoot deployment and application failures.
- Automated Azure virtual machines, virtual networks, and Linux configuration with ARM templates, Ansible, and PowerShell.

## DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

**Client:** HPE

**Skills Used:** Azure, Git, Terraform, ARM templates, Ansible, Python

- Created repeatable build and deployment pipelines for API, database, and UI components, promoting consistent artifacts across environments.
- Automated Azure infrastructure and application deployments with Terraform, ARM templates, Ansible, Python, and PowerShell.
- Maintained Git branching practices, build agents, environment-specific release parameters, and deployment documentation.
- Troubleshoot failed releases with development and operations teams and documented corrective actions and verification procedures.

## EDUCATION

### B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
