rajendranelakurthi.github.io

Lead AWS DevOps Engineer with 13+ years of overall IT experience spanning build and release engineering, enterprise cloud infrastructure, automation, and production operations. Delivers AWS infrastructure, Terraform and CloudFormation automation, secure CI/CD, and application integration across multiple environments. Combines VPC networking, IAM controls, Secrets Manager, EC2, managed databases, and EKS with Python/Bash tooling, observability, incident response, and recovery planning. Leads cross-team release coordination, technical coaching, and operational documentation.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

MuleSoft Certified Developer - Level 1

AWS INFRASTRUCTURE & DELIVERY LEADERSHIP

- Secure AWS Infrastructure** Delivered VPC networking, private service connectivity, identity controls, and repeatable Terraform/CloudFormation provisioning for enterprise workloads.
- Application & Platform Integration** Built Python FastAPI integrations for delivery tooling and supported microservices, database connectivity, certificates, and environment readiness.
- Reliable Delivery & Operations** Standardized CI/CD controls, coordinated production releases, and implemented monitoring, backup, and disaster-recovery capabilities.

CORE TECHNOLOGIES

INFRASTRUCTURE AS CODE

Terraform modules, CloudFormation, Ansible, configuration enforcement, infrastructure validation, environment provisioning

APPLICATION & DATABASE INTEGRATION

REST APIs, FastAPI, Java/Node.js microservices, Amazon RDS, Amazon Aurora, PostgreSQL, environment configuration

SECURITY & GOVERNANCE

IAM, role-based access, MFA, Secrets Manager, certificate management, policy controls, SonarQube, Fortify, Black Duck, JFrog Xray

CI/CD & SOURCE CONTROL

GitHub Actions, GitLab CI, Jenkins, CodePipeline, CodeBuild, CodeDeploy, Git branching, approvals, artifact versioning

AUTOMATION & LINUX

Python, Bash/Shell, PowerShell, AWS CLI, Linux, RHEL, Ubuntu, API-driven platform automation

TECHNICAL LEADERSHIP

Release coordination, architecture documentation, technical coaching, incident response, production support, runbooks, Agile/Scrum

CONTAINERS & RELIABILITY

Docker, Kubernetes, EKS, Helm, Argo CD, CloudWatch, CloudTrail, Prometheus, Grafana, ELK, AWS Backup, Elastic Disaster Recovery

AWS INFRASTRUCTURE & NETWORKING

EC2, VPC, Route 53, security groups, ALB/NLB, PrivateLink, VPC endpoints, VPN, Direct Connect, S3

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, AWS CodePipeline, PowerShell, Terraform, EKS, GitHub Actions, Milvus, Helm, Databricks on AWS

- Established Git branching, approval, and artifact versioning standards and integrated DevSecOps controls into release workflows through secure secrets handling, Terraform validation, and pre-deployment policy checks across AWS environments.
- Automated provisioning of Databricks environments on AWS across isolated accounts, standardizing network integration, IAM controls, and environment consistency.
- Implemented secure service connectivity using AWS PrivateLink, VPC endpoints, and private networking controls to protect sensitive application traffic.
- Architected and maintained scalable CI/CD pipelines using AWS CodePipeline, GitHub, and reusable deployment workflows to automate build, test, and release execution.
- Automated platform operations with Python, Bash, and PowerShell to reduce manual effort and accelerate provisioning, support, and recovery workflows.
- Supported Java and Node.js microservices on AWS, improving scalability, runtime stability, and production readiness for cloud-native applications.
- Authored technical documentation, deployment guides, and operational runbooks to improve knowledge transfer and support readiness.
- Directed end-to-end release management across multiple engineering teams by aligning schedules, dependencies, change windows, and risk mitigation plans.
- Coordinated incident response and production release support, minimizing downtime and accelerating service restoration during high-priority events.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: AWS, GitLab CI, Terraform, Jira, Kubernetes

- Improved Kubernetes release processes by standardizing deployment patterns, secure runner standards, controlled branch protections, container image validation, and pipeline checks across environments.
- Enforced SCM best practices and coached development teams on GitLab workflows, branch governance, and merge standards.
- Implemented GitLab CI best practices, including reusable templates, pipeline governance, and controlled branch-based execution.
- Troubleshoot pipeline, container, and Kubernetes issues in partnership with development teams to accelerate delivery and reduce deployment failures.
- Deployed and administered self-hosted and auto-scaling build agents for Linux and Windows workloads to support high-throughput CI/CD operations.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Linode, Python, Terraform, EKS, GitHub Actions, GitLab

- Designed secure VPC networking, Route 53 DNS, security groups, load balancing, VPN connectivity, Direct Connect, and traffic-routing patterns for enterprise workloads.
- Implemented GitHub Actions workflows for deploying services to Kubernetes clusters across multiple environments.
- Provisioned AWS infrastructure using CloudFormation, Terraform, and pipeline-driven infrastructure-as-code deployment patterns.
- Implemented disaster recovery, backup, and observability controls using AWS Elastic Disaster Recovery, AWS Backup, and Amazon CloudWatch.
- Troubleshoot build and release pipeline failures and resolved deployment issues across distributed engineering teams.
- Published versioned artifacts to enterprise repositories and package managers to support downstream engineering consumption and traceability.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: AWS, Python, Jenkins, GitHub Actions, SonarQube, JFrog, Terraform, Kubernetes, Prometheus, Ansible

- Implemented MFA, identity access controls, and role-based access management for users and groups across cloud environments.
- Developed internal APIs in Python FastAPI to integrate Jenkins, Jira, and JFrog processes with platform automation.
- Built resilient Ansible roles and playbooks to deploy highly available Grafana, Prometheus, and Node Exporter monitoring stacks.
- Authored and enforced custom policy controls aligned to internal security and governance requirements across AWS accounts.
- Developed custom Prometheus exporters in Python to capture application-specific operational metrics for SRE use cases.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise tooling for secure software delivery.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, AWS, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Supported enterprise applications on AWS by troubleshooting CloudWatch, Amazon RDS, load balancing, auto scaling, certificate management, CloudFront, and identity integrations.
- Worked extensively with AWS infrastructure services including EC2, CloudWatch, Secrets Manager, and managed database platforms for enterprise workloads.
- Automated fleet-level configuration enforcement for Linux and Windows EC2 instances and managed secure access and database connectivity in line with enterprise security standards.
- Built continuous delivery pipelines and supported REST-based microservices deployments across Demo, Test, Pentest, Training, CTDEV, Sandbox, UAT, and PROD environments.
- Used CloudFormation and PowerShell scripting to provision and manage cloud resources in a repeatable and auditable manner.
- Designed monitoring architecture to collect application, infrastructure, and platform metrics using the ELK stack.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: AWS, Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Authored and maintained Terraform modules and executed infrastructure changes through automated CI/CD workflows.
- Executed Terraform deployments through pipelines and promoted the same artifact set across multiple environments through controlled environment selection.
- Managed variable groups and environment-specific configuration to separate deployments cleanly across stages.
- Documented build and deployment flows for core infrastructure, API, database, and UI components to improve team consistency.
- Authored AWS CLI automation to update service configurations and standardize administrative operations.

Build & Release Engineer | Calin Infotech

08/2013 - 08/2016

Project: Expedia Travel Portal

Skills Used: Build & Release, Shell Scripting, Linux, Source Control, Application Deployment

- Supported application builds, release packaging, and deployment coordination for the Expedia Travel Portal across development and test environments.
- Partnered with developers and QA to investigate build and deployment failures, verify application smoke tests, and support release handovers.
- Prepared shell scripts for deployment preparation, configuration checks, and log collection to simplify recurring release support tasks.
- Maintained version-controlled build configurations and release documentation, tracking artifact versions and environment-specific settings.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
