rajendranelakurthi.github.io

Lead DevOps Engineer with 10+ years of experience in cloud platforms, CI/CD automation, and production release delivery, with a focus on Azure engineering. Partners with development, QA, and data engineering teams to automate application and database releases. Combines **Azure DevOps, GitHub Actions, Liquibase, Snowflake, Terraform, PowerShell, Python, and Bash** with Azure infrastructure, container delivery, secure access, and operational troubleshooting. Builds version-controlled deployment processes with review gates, environment configuration, verification, and recovery planning.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

KEY PLATFORM ACHIEVEMENTS

- Database Delivery** Integrated version-controlled database changes with application releases, validation gates, deployment evidence, and recovery procedures.
- GitHub Automation** Standardized reusable workflows, pull request checks, branching practices, and controlled promotion across development, QA, and production.
- Azure & DataOps** Connected Azure provisioning, cloud data-platform delivery, and operational monitoring to improve release consistency and developer productivity.

CORE TECHNOLOGIES

DATABASE CHANGE MANAGEMENT

Liquibase, changelogs, changesets, SQL, schema versioning, validation, deployment history, rollback scripts

SNOWFLAKE & DATA PLATFORMS

Snowflake, databases, schemas, virtual warehouses, RBAC, SQL deployment, query history, resource monitors; Azure SQL Database, PostgreSQL, MySQL

GITHUB & CI/CD

GitHub repositories, GitHub Actions, pull requests, branch protection, merge strategies, reusable workflows, Jenkins, Azure DevOps

CLOUD & INFRASTRUCTURE AS CODE

Azure, Terraform, ARM templates, Ansible, virtual networks, Azure Key Vault, Microsoft Entra ID, RBAC; additional cloud experience: AWS

SCRIPTING & CONTAINERS

PowerShell, Python, Bash, Azure CLI, Linux, Docker, Kubernetes, AKS, Azure Container Registry, Helm, ArgoCD

RELEASE QUALITY & OPERATIONS

DataOps, integration testing, deployment approvals, artifact management, SonarQube, Azure Monitor, Log Analytics, Prometheus, Grafana, Splunk

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: Azure, Azure DevOps, GitHub Actions, Liquibase, Snowflake, Terraform, AKS, Key Vault, PowerShell

- Owned CI/CD delivery for SaaS application and database releases, coordinating development, QA, and data engineering requirements, dependencies, release windows, and production verification.
- Built reusable GitHub Actions and Azure DevOps workflows for application builds and Liquibase deployments, using pull request checks, environment approvals, and versioned release artifacts.
- Managed Liquibase changelogs and ordered changesets in Git, validating syntax and reviewing generated SQL before promoting schema changes through development, QA, and production.
- Automated Snowflake SQL deployments for databases, schemas, tables, views, and grants, separating environment configuration from version-controlled migration logic.
- Configured Snowflake roles and warehouse settings, using least-privilege deployment access, auto-suspend, resource monitors, and query history to support secure and efficient operations.
- Established GitHub repository conventions, branch protections, required reviews, and merge controls so application and database changes remained traceable to approved pull requests.
- Developed Python, Bash, and PowerShell automation for pre-deployment checks, database connectivity validation, deployment summaries, and post-release smoke tests.
- Provisioned Azure virtual networks, compute, and AKS infrastructure with Terraform; integrated Key Vault and federated pipeline authentication and published Docker images to Azure Container Registry.
- Troubleshooted failed migrations, Snowflake permissions, and pipeline failures using deployment logs and Azure Monitor; coordinated recovery with application owners and preserved release evidence.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: Azure, Snowflake, Liquibase, GitHub, GitLab CI, Jenkins, Docker, Kubernetes

- Partnered with developers and QA on Azure-hosted application delivery, standardizing build-agent configuration, reusable pipeline stages, environment settings, and release checks.
- Managed Liquibase changelogs in Git and automated Snowflake schema deployments through reviewed pipeline stages, separating development, QA, and production configuration.
- Migrated Jenkins pipelines to GitLab CI and supported GitHub integration patterns for source review, automated validation, and release traceability.
- Troubleshot Liquibase validation errors, Snowflake role permissions, and SQL deployment failures alongside Docker, Kubernetes, and runner issues with engineering teams.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: Azure, Snowflake, Liquibase, GitHub Actions, Terraform, AKS, Python

- Built GitHub Actions and Jenkins pipelines for application and database releases, coordinating schema updates with service rollout and post-deployment validation.
- Integrated Liquibase validation and update stages for Snowflake schema changes, maintaining migration history, explicit rollback scripts, and reviewed environment promotion.
- Provisioned Azure infrastructure through Terraform and ARM templates and deployed containerized services to AKS with Helm and ArgoCD.
- Automated release checks and operational tasks using Python, Bash, and PowerShell; published versioned artifacts for repeatable downstream deployment.
- Used Azure Monitor, Log Analytics, and pipeline telemetry to investigate slow deployments, infrastructure failures, and application connectivity issues with development teams.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: Azure, Snowflake, Liquibase, GitHub Actions, Jenkins, Python, JFrog, Terraform, AKS

- Delivered CI/CD automation for SaaS services and payment-platform workloads, aligning application releases, database dependencies, and infrastructure changes.
- Standardized GitHub Actions and Jenkins workflows for build, test, artifact publication, and environment promotion, integrating SonarQube and secure secrets handling.
- Developed Python FastAPI integrations for Jenkins, Jira, and JFrog to automate onboarding and reduce manual coordination of release activities.
- Partnered with developers and data engineers on Liquibase changesets for Snowflake tables and views, reviewing SQL, application compatibility, deployment order, and recovery plans.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray, maintaining reusable shared libraries and consistent artifact versioning.
- Built Terraform modules for Azure networking and AKS, standardized Helm deployments and Ansible configuration, and used Prometheus and Grafana to support incident diagnosis.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Azure, Snowflake, Liquibase, Jenkins, ARM templates, Ansible, PowerShell, Helm

- Built Jenkins and Maven delivery pipelines for REST microservices across test, security-validation, UAT, and production environments.
- Coordinated Liquibase database changes and Snowflake SQL deployments with developers and QA, documenting migration order, role requirements, environment configuration, and verification steps.
- Automated Azure virtual machines, virtual networks, and Linux configuration with ARM templates, Ansible, and PowerShell; managed Key Vault integration and secure database connectivity.
- Packaged Kubernetes services with Helm and used ELK, Azure Monitor, and Log Analytics to troubleshoot deployment and application failures.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: Azure, Snowflake, Liquibase, Git, Terraform, ARM templates, Ansible, Python, SQL

- Created repeatable build and deployment pipelines for API, database, and UI components, promoting consistent artifacts across development and production.
- Maintained Git branching practices and Liquibase changelogs for Snowflake schema changes, versioning SQL and environment configuration to improve release traceability.
- Automated Azure infrastructure with Terraform and ARM templates and application deployments with Ansible, Python, and PowerShell, keeping configuration consistent across environments.
- Managed build agents, release parameters, and deployment documentation, troubleshooting failed releases with development and operations teams.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
