rajendranelakurthi.github.io

Lead AWS DevOps Engineer with 10 years of experience in cloud engineering, CI/CD automation, and production operations. Combines **AWS infrastructure, CloudFormation, GitHub Actions, Docker, Kubernetes, and troubleshooting** with learner 1:1 sessions, technical presentations, group Q&A, and cross-team communication. Helps engineers understand deployment workflows, source-control standards, cloud dependencies, and operational diagnostics through practical guidance and reusable documentation. Builds Python/FastAPI automation and supports GPU-enabled Kubernetes and vector-search workloads, bringing applied AI-platform context to technical discussions.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS ENGINEERING & TECHNICAL MENTORING HIGHLIGHTS

- **Cloud Delivery & Troubleshooting** Connects AWS infrastructure, CloudFormation, CI/CD, container orchestration, monitoring, and production diagnostics to practical engineering use cases.
- **Practical Engineering Guidance** Coaches development teams on Git workflows, branch governance, merge standards, and repeatable deployment practices.
- **Knowledge Transfer & AI Platforms** Creates deployment guides and runbooks and engineers GPU-enabled Kubernetes and vector-search platforms for AI application workloads.

CORE TECHNOLOGIES

AWS FUNDAMENTALS & CORE SERVICES

Cloud compute, storage, databases, networking and identity; EC2, S3, RDS, Lambda, VPC, IAM, EKS, ECR, Route 53, CloudFront, AWS CLI, DynamoDB, SNS, Elastic Beanstalk

MENTORING & COLLABORATION

Learner 1:1 video sessions, technical presentations, group Q&A, engineer coaching, Git workflow guidance, knowledge transfer, deployment walkthroughs, technical documentation

CLOUD NETWORKING & SECURITY

VPC, subnets, security groups, load balancing, ALB/NLB, autoscaling, private connectivity, IAM roles/policies, least privilege, MFA, Secrets Manager

MONITORING & TROUBLESHOOTING

Amazon CloudWatch, CloudTrail, Prometheus, Grafana, Splunk, ELK, logs/metrics, incident diagnosis, recovery runbooks, AWS Backup, Elastic Disaster Recovery

SERVERLESS & AI PLATFORM CONCEPTS

AWS Lambda event-driven architecture, DynamoDB, SNS, Elastic Beanstalk; AI-platform use cases, GPU-enabled Kubernetes, vector-search infrastructure

CLOUDFORMATION & INFRASTRUCTURE AS CODE

AWS CloudFormation, YAML/JSON infrastructure templates, stack-based provisioning, Terraform modules, Ansible, environment configuration, reviewed infrastructure changes

CI/CD & CONTAINERIZATION

GitHub Actions, Jenkins, GitLab CI/CD, CodePipeline, Docker images, Kubernetes/EKS, Helm, Argo CD, build agents, automated testing, artifacts, release promotion

AUTOMATION & MICROSERVICES

Python, Bash, PowerShell, FastAPI, REST APIs, Linux, deployment automation, microservices configuration, scalable Kubernetes workloads

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, Python, Bash, Terraform, EKS, GitHub Actions, CodePipeline, Helm

- Architected reusable CI/CD pipelines with AWS CodePipeline and GitHub workflows to automate build, test, and release execution across engineering teams.
- Established Git branching, approval, and artifact versioning standards and integrated DevSecOps controls into release workflows through secure secrets handling, Terraform validation, and pre-deployment policy checks across AWS environments.
- Implemented secure service connectivity using AWS PrivateLink, VPC endpoints, and private networking controls to protect sensitive application traffic.
- Standardized deployment pipelines for AWS and hybrid environments, improving release consistency, auditability, and operational reliability.
- Developed Python, Bash, and PowerShell automation for provisioning, platform support, and recovery workflows, reducing manual operational effort.
- Managed self-hosted runners, build agents, and distributed deployment infrastructure to optimize pipeline throughput across controlled compute environments.
- Directed release planning across engineering teams, aligning dependencies, change windows, delivery risks, and production support.
- Coordinated incident response and production release support, minimizing downtime and accelerating service restoration during high-priority events.
- Guided engineering teams through deployment workflows, environment dependencies, and operational runbooks, explaining implementation choices and troubleshooting steps.
- Reviewed pipeline and infrastructure changes with engineers, connecting Git branching, validation checks, security controls, and release readiness to practical delivery scenarios.
- Designed Terraform-based EKS infrastructure for high-throughput vector search and GPU-enabled workloads, integrating repeatable provisioning with container delivery.
- Authored deployment guides, architecture documentation, and operational runbooks that explain provisioning prerequisites, release steps, validation, and recovery procedures for engineering teams.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: GitLab CI/CD, Jenkins, Docker, Kubernetes, Git, Linux, AWS

- Deployed and administered self-hosted and auto-scaling build agents for Linux and Windows workloads to support high-throughput CI/CD operations.
- Improved Kubernetes release processes by standardizing deployment patterns, secure runner standards, controlled branch protections, container image validation, and pipeline checks across environments.
- Coached development teams on GitLab workflows, branch governance, and merge standards, clarifying source-control practices and resolving delivery-process questions.
- Migrated Jenkins pipelines to GitLab CI and modernized runner configuration to improve maintainability and pipeline reliability.
- Implemented GitLab CI best practices, including reusable templates, pipeline governance, and controlled branch-based execution.
- Administered Kubernetes clusters and deployed applications through pods, deployments, services, and core platform components.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Linode, Python, Terraform, EKS, GitHub Actions, GitLab

- Implemented GitHub Actions workflows for deploying services to Kubernetes clusters across multiple environments.
- Implemented disaster recovery, backup, and observability controls using AWS Elastic Disaster Recovery, AWS Backup, and Amazon CloudWatch.
- Provisioned AWS infrastructure using CloudFormation, Terraform, and pipeline-driven infrastructure-as-code deployment patterns.
- Designed secure VPC networking, Route 53 DNS, security groups, load balancing, VPN connectivity, Direct Connect, and traffic-routing patterns for enterprise workloads.
- Established and maintained CI/CD pipelines with Jenkins, Git, Amazon ECR, and Kubernetes for repeatable application delivery.
- Deployed Kubernetes microservices through Argo CD-based GitOps workflows.
- Built Docker images and deployed containerized applications to EKS using Helm charts and Kubernetes manifests.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: Python, FastAPI, Jenkins, GitHub Actions, Terraform, Ansible, Kubernetes, Prometheus, JFrog

- Standardized GitHub Actions-based CI/CD patterns to accelerate software delivery and reduce pipeline drift across teams.
- Developed internal APIs in Python FastAPI to integrate Jenkins, Jira, and JFrog processes with platform automation.
- Developed custom Prometheus exporters in Python to capture application-specific operational metrics for SRE use cases.
- Designed and delivered a Terraform and Kubernetes solution for payment-platform deployments, enabling repeatable infrastructure provisioning and container orchestration.
- Built resilient Ansible roles and playbooks to deploy highly available Grafana, Prometheus, and Node Exporter monitoring stacks.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise tooling for secure software delivery.
- Developed Jenkins shared libraries to automate image versioning and publish artifacts to private JFrog repositories.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, AWS, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Supported enterprise applications on AWS by troubleshooting CloudWatch, Amazon RDS, load balancing, auto scaling, certificate management, CloudFront, and identity integrations.
- Built continuous delivery pipelines and supported REST-based microservices deployments across Demo, Test, Pentest, Training, CTDEV, Sandbox, UAT, and PROD environments.
- Automated fleet-level configuration enforcement for Linux and Windows EC2 instances and managed secure access and database connectivity in line with enterprise security standards.
- Built Kubernetes environments with pods, deployments, services, and ConfigMaps, and managed Helm-based release packaging for multi-namespace workloads.
- Used CloudFormation and PowerShell scripting to provision and manage cloud resources in a repeatable and auditable manner.
- Served as acting scrum master by managing stories, epics, sprint commitments, and core scrum ceremonies.

Client: HPE**Skills Used:** AWS, Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Authored and maintained Terraform modules and executed infrastructure changes through automated CI/CD workflows.
- Executed Terraform deployments through pipelines and promoted the same artifact set across multiple environments through controlled environment selection.
- Authored AWS CLI automation to update service configurations and standardize administrative operations.
- Created deployment pipelines with Ansible to promote releases from development through production in a controlled, repeatable manner.
- Defined and implemented branching strategies for Git repositories to improve release governance and code promotion.

Build & Release Engineer | Calin Infotech

08/2013 - 08/2016

Project: Expedia Travel Portal**Skills Used:** Build & Release, Shell Scripting, Linux, Source Control, Application Deployment

- Supported application builds, release packaging, and deployment coordination for the Expedia Travel Portal across development and test environments.
- Prepared shell scripts for deployment preparation, configuration checks, and log collection to simplify recurring release support tasks.
- Maintained version-controlled build configurations and release documentation, tracking artifact versions and environment-specific settings.
- Partnered with developers and QA to investigate build and deployment failures, verify application smoke tests, and support release handovers.

TECHNICAL MENTORING

Learner Support & Technical Knowledge Sharing

- Delivered personalized learner 1:1 video sessions, addressing technical questions and explaining cloud, automation, and deployment concepts.
- Delivered technical presentations and deep-dive discussions using practical engineering examples to clarify cloud infrastructure and DevOps workflows.
- Facilitated group Q&A sessions, answering learner questions and breaking complex technical issues into understandable troubleshooting steps.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
