Lead DevOps Engineer | AWS & SRE

Lead DevOps Engineer with 10 years of experience in DevOps, cloud engineering, and production operations. Builds AWS infrastructure, reusable Terraform modules, GitHub Actions delivery workflows, and Kubernetes platforms. Combines Python/Bash automation, GitOps, secure IAM access, cloud observability, incident troubleshooting, and recovery readiness. Brings Azure delivery experience and GCP architecture knowledge alongside an AWS-focused engineering background. Evaluates observability-as-code and platform self-service patterns for standardized infrastructure and monitoring delivery.

Certifications

AWS Certified Solutions Architect - Associate	GitLab Certified Associate	Microsoft Certified: Azure Fundamentals	Microsoft Certified: Azure DevOps Engineer Expert
---	----------------------------	---	---

AWS DevOps & SRE Highlights

- Terraform & AWS Automation: Builds reusable Terraform infrastructure and pipeline-driven AWS provisioning with controlled environment configuration, IAM access, and production validation.
- GitHub Actions & GitOps: Standardizes infrastructure and application delivery through reusable workflows, reviewed changes, versioned artifacts, Kubernetes deployment checks, and release approvals.
- SRE & Platform Engineering: Connects CloudWatch, Prometheus, Python automation, incident response, and recovery runbooks to support reliable enterprise platforms.

Core Technologies

Advanced Terraform & Platform Knowledge

Remote state, workspaces, import blocks, for_each, dynamic blocks; GitHub OIDC, environments/approvals, PR plan/apply; Organizations, Control Tower/AFT, Kinesis Firehose, ECS/Fargate, Backstage, HashiCorp Vault; tfint, Checkov/tfsec, OPA, pre-commit

CI/CD & GitOps

GitHub Actions, GitLab CI, Jenkins/CloudBees, AWS CodePipeline, CodeBuild, CodeDeploy, Git, approvals, artifact versioning, Docker, Kubernetes, Helm, Argo CD

Terraform & Infrastructure Automation

Terraform, reusable modules, environment configuration, infrastructure plans, CI/CD provisioning, Ansible, Python, Bash, HCL

SRE & Observability

CloudWatch, CloudTrail, Prometheus, Grafana, Python exporters, Splunk, ELK, incident troubleshooting, root-cause analysis, AWS Backup, Elastic Disaster Recovery

Observability as Code Knowledge

New Relic Terraform Provider, dashboards, alert policies, NRQL conditions, workflows, destinations, synthetics, AWS cloud integrations

AWS Infrastructure & Security

AWS, IAM, VPC, EC2, EKS, ECR, Lambda, S3, RDS, Route 53, ALB/NLB, PrivateLink, VPC endpoints, CloudFormation, AWS CLI

Multi Cloud Exposure

AWS production engineering; Azure infrastructure and AKS delivery experience; GCP/GKE architecture knowledge

Platform Engineering & Systems

Python, FastAPI, REST APIs, Bash, PowerShell, Linux, Windows build agents, self-service integrations, JFrog Artifactory, Xray, SonarQube, runbooks

Professional Experience

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, AWS CodePipeline, PowerShell, Terraform, EKS, GitHub Actions, Milvus, Helm, Databricks on AWS, Python, Bash, CloudWatch, Docker, IAM, VPC

- Developed reusable Terraform infrastructure patterns for EKS and AWS application environments, aligning network dependencies, IAM access, and deployment configuration with platform standards.
- Built and maintained AWS infrastructure and application delivery workflows with GitHub Actions and CodePipeline, standardizing build, validation, release promotion, and deployment checks.
- Designed and implemented scalable EKS and Terraform-based infrastructure to support high-throughput vector search platforms powered by Milvus and GPU-enabled workloads.
- Automated provisioning of Databricks environments on AWS across isolated accounts, standardizing network integration, IAM controls, and environment consistency.

- Standardized reusable pipeline patterns, environment configuration, Git reviews, release approvals, and versioned artifacts for consistent AWS and hybrid deployments.
- Automated platform operations with Python, Bash, and PowerShell to reduce manual effort and accelerate provisioning, support, and recovery workflows.
- Established Git branching and approval standards and integrated Terraform validation, secure secrets handling, and pre-deployment policy checks into infrastructure delivery.
- Implemented secure service connectivity using AWS PrivateLink, VPC endpoints, and private networking controls to protect sensitive application traffic.
- Coordinated incident response and production release support, minimizing downtime and accelerating service restoration during high-priority events.
- Authored technical documentation, deployment guides, and operational runbooks to improve knowledge transfer and support readiness.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: AWS, GitLab CI, Terraform, Jira, Kubernetes

- Managed Docker image build, provisioning, and runtime administration to standardize containerized delivery workflows.
- Administered Kubernetes clusters and deployed applications through pods, deployments, services, and core platform components.
- Improved Kubernetes release processes by standardizing deployment patterns, secure runner standards, controlled branch protections, container image validation, and pipeline checks across environments.
- Migrated Jenkins pipelines to GitLab CI and modernized runner configuration to improve maintainability and pipeline reliability.
- Deployed and administered self-hosted and auto-scaling build agents for Linux and Windows workloads to support high-throughput CI/CD operations.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Linode, Python, Terraform, EKS, GitHub Actions, GitLab

- Provisioned AWS infrastructure using CloudFormation, Terraform, and pipeline-driven infrastructure-as-code deployment patterns.
- Implemented disaster recovery, backup, and observability controls using AWS Elastic Disaster Recovery, AWS Backup, and Amazon CloudWatch.
- Implemented GitHub Actions workflows for deploying services to Kubernetes clusters across multiple environments.
- Built Docker images and deployed containerized applications to EKS using Helm charts and Kubernetes manifests.
- Designed secure VPC networking, Route 53 DNS, security groups, load balancing, VPN connectivity, Direct Connect, and traffic-routing patterns for enterprise workloads.
- Authored PowerShell and shell automation scripts and published them to shared repositories for consistent reuse across environments.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: AWS, Python, Jenkins, GitHub Actions, SonarQube, JFrog, Terraform, Kubernetes, Prometheus, Ansible

- Designed and delivered a Terraform and Kubernetes solution for payment-platform deployments, enabling repeatable infrastructure provisioning and container orchestration.
- Designed CI/CD pipelines for application and infrastructure deployments across AWS environments.
- Authored and enforced custom policy controls aligned to internal security and governance requirements across AWS accounts.
- Implemented MFA, identity access controls, and role-based access management for users and groups across cloud environments.
- Developed internal APIs in Python FastAPI to integrate Jenkins, Jira, and JFrog processes with platform automation.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise tooling for secure software delivery.
- Developed custom Prometheus exporters in Python to capture application-specific operational metrics for SRE use cases.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, AWS, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Worked extensively with AWS infrastructure services including EC2, CloudWatch, Secrets Manager, and managed database platforms for enterprise workloads.
- Supported enterprise applications on AWS by troubleshooting CloudWatch, Amazon RDS, load balancing, auto scaling, certificate management, CloudFront, and identity integrations.
- Used CloudFormation and PowerShell scripting to provision and manage cloud resources in a repeatable and auditable manner.
- Planned and executed migration strategies for traditional workloads to AWS using lift-and-shift and modernization approaches.
- Automated fleet-level configuration enforcement for Linux and Windows EC2 instances and managed secure access and database connectivity in line with enterprise security standards.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: AWS, Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Authored and maintained Terraform modules and executed infrastructure changes through automated CI/CD workflows.
- Created deployment pipelines with Ansible to promote releases from development through production in a controlled, repeatable manner.
- Authored AWS CLI automation to update service configurations and standardize administrative operations.
- Created CI/CD pipelines for multiple application components across shared delivery platforms.
- Managed variable groups and environment-specific configuration to separate deployments cleanly across stages.

Education

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
