rajendranelakurthi.github.io

Terraform-focused AWS infrastructure and DevSecOps engineer with 10+ years of enterprise cloud, delivery automation, and production operations experience. Builds repeatable AWS infrastructure using **Terraform modules, pipeline-driven provisioning, environment-specific configuration, and infrastructure validation.** Experience spans EKS platforms, enterprise AWS environments, payment-platform infrastructure, and automated environment promotion. Combines infrastructure as code with Databricks provisioning, private networking, IAM controls, and Python/Bash automation to support secure enterprise delivery.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

TERRAFORM & AWS INFRASTRUCTURE HIGHLIGHTS

- **Reusable AWS Infrastructure** Authored Terraform modules and automated infrastructure deployments to standardize provisioning across environments.
- **Terraform Delivery Controls** Integrated Terraform validation, secrets handling, and pre-deployment policy checks into AWS release workflows.
- **Platform Infrastructure** Delivered Terraform-based EKS infrastructure for vector-search workloads and Terraform/Kubernetes solutions for payment-platform deployments.
- **AWS Data Platforms** Automated Databricks environment provisioning across isolated AWS accounts with consistent networking and IAM controls.

CORE TECHNOLOGIES

TERRAFORM & INFRASTRUCTURE AS CODE

Terraform modules, AWS infrastructure provisioning, CI/CD-driven Terraform deployments, Terraform validation, environment-specific configuration, CloudFormation, Ansible

AWS INFRASTRUCTURE & NETWORKING

AWS multi-account environments, EC2, VPC, IAM, S3, EKS, Route 53, ALB/NLB, PrivateLink, VPC endpoints, VPN, Direct Connect

DATABRICKS ON AWS

Environment provisioning, isolated AWS accounts, network integration, IAM controls, environment consistency

CI/CD & DEVSECOPS

CodePipeline, GitHub Actions, GitLab CI, Jenkins, secure secrets handling, Terraform validation, policy checks, SonarQube, Fortify, Black Duck, JFrog Xray

SCRIPTING & PLATFORMS

Python, Bash, PowerShell, Linux, Docker, Kubernetes, Helm, ArgoCD

SECURITY & RELIABILITY

IAM, MFA, role-based access controls, private networking, CloudWatch, CloudTrail, Prometheus, Grafana, AWS Backup, AWS Elastic Disaster Recovery

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: Terraform, AWS, AWS CodePipeline, PowerShell, EKS, GitHub Actions, Milvus, Helm, Databricks on AWS

- Engineered Terraform-based AWS and EKS infrastructure for high-throughput Milvus vector-search platforms and GPU-enabled workloads.
- Standardized AWS infrastructure provisioning with Terraform as part of repeatable platform delivery across enterprise environments.
- Integrated Terraform validation and pre-deployment policy checks into AWS release workflows to strengthen infrastructure change governance.
- Combined secure secrets handling, Git approvals, and artifact versioning standards with infrastructure delivery controls.
- Automated Databricks provisioning across isolated AWS accounts, standardizing network integration, IAM controls, and environment consistency.
- Implemented AWS PrivateLink, VPC endpoints, and private networking controls to secure application connectivity.
- Automated AWS provisioning, support, and recovery workflows with Python, Bash, and PowerShell.
- Built AWS CodePipeline and GitHub delivery workflows and supported production releases, incident response, and operational runbooks.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: Terraform, AWS, GitLab CI, Jira, Kubernetes

- Supported AWS delivery environments using Terraform, GitLab CI, and Kubernetes as part of the enterprise DevOps toolchain.
- Migrated Jenkins pipelines to GitLab CI and standardized reusable pipeline templates and controlled branch-based execution.
- Enforced protected branches, secure runner standards, container image validation, and pipeline checks across delivery environments.
- Administered Linux and Windows build agents and resolved pipeline, container, and Kubernetes failures with development teams.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: Terraform, AWS, Linode, Python, EKS, GitHub Actions, GitLab

- Provisioned AWS infrastructure with Terraform and CloudFormation through pipeline-driven infrastructure-as-code workflows.
- Standardized repeatable AWS infrastructure delivery using version-controlled Terraform configuration and automated deployment pipelines.
- Designed secure AWS VPC networking, security groups, load balancing, Route 53 DNS, VPN, and Direct Connect connectivity for enterprise workloads.
- Integrated infrastructure provisioning with EKS application delivery using GitHub Actions, Jenkins, Helm, and Kubernetes manifests.
- Implemented AWS Backup, Elastic Disaster Recovery, and CloudWatch controls to support infrastructure recovery and operational visibility.
- Authored reusable shell and PowerShell automation for cloud operations and release support.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: Terraform, AWS, Python, Jenkins, GitHub Actions, SonarQube, JFrog, Kubernetes, Prometheus, Ansible

- Designed and delivered Terraform infrastructure and Kubernetes orchestration for AWS payment-platform deployments.
- Used Terraform-based provisioning to make payment-platform infrastructure repeatable across deployment environments.
- Built CI/CD workflows for AWS application and infrastructure changes, aligning provisioning with controlled software delivery.
- Authored policy controls for AWS accounts and implemented MFA, identity controls, and role-based access management.
- Automated enterprise platform onboarding and developed Python FastAPI integrations across Jenkins, Jira, and JFrog.
- Administered CloudBees Jenkins, Artifactory, and Xray; developed Jenkins shared libraries for image versioning and artifact publication.
- Built Python Prometheus exporters and Ansible monitoring roles for production observability.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, AWS, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Provisioned AWS resources with CloudFormation and PowerShell, applying repeatable, auditable infrastructure-as-code practices.
- Automated configuration enforcement for Linux and Windows EC2 fleets and managed secure access and database connectivity.
- Supported EC2, CloudWatch, RDS, load balancing, auto scaling, Secrets Manager, and CloudFront for enterprise applications.
- Planned AWS workload migrations and validated post-migration configuration through cutover and failover testing.
- Integrated enterprise identity controls and strengthened privileged access, identity protection, and MFA.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: Terraform, AWS, Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Authored and maintained reusable Terraform modules for infrastructure provisioning and executed changes through automated CI/CD workflows.
- Ran Terraform deployments through pipelines, using controlled environment selection to promote infrastructure changes across stages.
- Managed environment-specific configuration and variable groups to separate deployment settings across development and production workflows.
- Combined Terraform infrastructure automation with AWS CLI scripts to standardize cloud configuration and administrative operations.
- Documented infrastructure, API, database, and UI deployment flows and applied Git branching standards for controlled release promotion.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
