rajendranlakurthi.github.io

Build and Release Engineer with 10+ years of enterprise software delivery, CI/CD automation, and release governance experience.

Focused on **Azure DevOps, Jenkins, .NET/MSBuild, Git/Gerrit, Docker, and JFrog Artifactory**. Designs repeatable build, package, and deployment workflows; administers Windows/Linux build agents; and automates release tasks with PowerShell, Python, and Bash. Coordinates dependencies, approvals, artifact promotion, and production releases with engineering, QA, and operations teams.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

MuleSoft Certified Developer - Level 1

BUILD & RELEASE ENGINEERING HIGHLIGHTS

- Azure DevOps & .NET Delivery** Standardized build and release workflows around Azure DevOps, MSBuild, controlled source changes, and environment-specific deployment configuration.
- Jenkins & Artifact Engineering** Administered CloudBees Jenkins and JFrog tooling; built shared libraries for image versioning and repeatable artifact publication.
- Release Governance** Aligned release scope, dependencies, change windows, approvals, stakeholder updates, and production support across engineering teams.
- Automation & Build Reliability** Automated release operations with PowerShell, Python, and Bash and supported consistent Windows/Linux agent execution.

CORE TECHNOLOGIES

AZURE DEVOPS & JENKINS

Azure DevOps, Azure Pipelines, Jenkins, CloudBees Jenkins, reusable pipelines, shared libraries, Windows/Linux agents, agent pools

.NET BUILD & RELEASE

MSBuild, .NET (C#), Windows builds, PowerShell, build configuration, package publication, release promotion, deployment troubleshooting

SCM & ENTERPRISE GOVERNANCE

Git, Gerrit, branching strategies, merge standards, approvals, release dependencies, change windows, release reporting

JFROG & ARTIFACT MANAGEMENT

JFrog Artifactory, Xray, Nexus, package feeds, upstream repositories, image versioning, controlled artifact promotion, SonarQube

DOCKER & DEPLOYMENT

Docker builds, container administration, image validation, Ansible deployment automation, environment-specific configuration

AUTOMATION & OPERATIONAL SECURITY

PowerShell, Python, Bash, API integrations, secrets handling, certificate troubleshooting, deployment guides, production release support

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: Azure DevOps, Azure Pipelines, .NET/MSBuild, Git, PowerShell, Build Agents, Release Governance

- Led enterprise .NET build and release delivery with Azure DevOps, coordinating application dependencies, release scope, change windows, and production readiness.
- Standardized Azure Pipelines build and release workflows around source checkout, MSBuild execution, package publication, and controlled environment promotion.
- Automated Windows build and deployment tasks with PowerShell, separating build configuration from environment-specific release settings.
- Established Git branching, approval, and artifact versioning standards to preserve traceability between source changes and released packages.
- Managed self-hosted build agents and execution environments, resolving build-tool, access, configuration, and pipeline failures.
- Led migration of Azure DevOps repositories and delivery pipelines to GitLab, defining phased cutovers, validation gates, and rollback procedures.
- Integrated secure secrets handling and pre-deployment checks into enterprise release workflows.
- Coordinated release schedules, dependency reviews, milestone reporting, risk escalation, and production support across engineering teams.
- Authored deployment guides and recovery runbooks and automated recurring release support tasks with Python, Bash, and PowerShell.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: Jenkins, GitLab CI, Git, Docker, Linux/Windows Agents

- Migrated Jenkins pipelines to GitLab CI, modernizing runner configuration and improving pipeline maintainability.
- Administered Windows and Linux build agents, agent pools, runner templates, and execution policies to keep enterprise builds consistent and reliable.
- Created package views, artifact feeds, and upstream repository strategies for application-team delivery requirements.
- Separated package feeds, upstream sources, and execution settings to support repeatable dependency consumption and controlled release packaging.
- Managed Docker image builds and container runtime administration to standardize application delivery.
- Enforced GitLab branching and merge standards, reusable pipeline templates, secure runners, and image validation checks.
- Troubleshot build, pipeline, and container failures with development teams to resolve release blockers.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: Jenkins, Git, GitHub Actions, Docker, Maven, Ansible, PowerShell

- Built and maintained Jenkins-based CI/CD workflows with Git, Maven, Ansible, and Docker for repeatable application delivery.
- Configured Windows/Linux build agents and environment-specific release targets, isolating deployment settings from reusable pipeline logic.
- Implemented GitHub Actions deployment workflows and standardized container image build and release processes.
- Published versioned artifacts to enterprise repositories and package managers for downstream consumption and traceability.
- Troubleshoot failed builds and package publication by tracing source revisions, dependency resolution, agent configuration, and repository access.
- Integrated Jenkins, GitHub, and SonarQube with engineering collaboration tools to support delivery and audit requirements.
- Authored reusable shell and PowerShell scripts and resolved build, dependency, and deployment pipeline failures.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: CloudBees Jenkins, JFrog Artifactory, Xray, Python, GitHub Actions, Ansible

- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise services supporting secure software delivery.
- Developed Jenkins shared libraries to automate image versioning and artifact publication to private JFrog repositories.
- Connected Jenkins automation to Artifactory publication workflows so application teams could consume consistently versioned release outputs.
- Standardized reusable GitHub Actions CI/CD patterns and designed application deployment pipelines.
- Built Python FastAPI integrations connecting Jenkins, Jira, and JFrog to automate recurring delivery workflows.
- Automated onboarding of new projects to the enterprise DevOps platform through API-driven processes.
- Partnered with development teams to investigate defects and improve release quality through sprint retrospectives.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Jenkins, PowerShell, Git, Ansible, Release Packaging, Certificate Support

- Built continuous delivery pipelines for enterprise applications across Demo, Test, Pentest, Training, CTDEV, Sandbox, UAT, and production.
- Standardized application release packaging and supported consistent deployment of REST-based microservices.
- Presented CI/CD automation strategies and delivery improvements to engineering stakeholders.
- Troubleshoot certificate-management and identity-integration issues affecting enterprise application availability and release readiness.
- Coordinated sprint commitments and delivery priorities while supporting application deployment and release troubleshooting.
- Automated configuration tasks with PowerShell and maintained operational consistency across Linux and Windows application environments.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: GitLab, Git, Maven, Ansible, Nexus, Python, Shell

- Created Ansible deployment pipelines to promote application releases from development through production in a controlled, repeatable manner.
- Built YAML-based build and release workflows with event-driven triggers for continuous integration on code changes.
- Defined Git branching strategies and managed self-hosted build agents supporting release execution.
- Promoted the same artifact set across environments using controlled selection and environment-specific configuration.
- Managed variable groups and environment-specific settings to keep release configuration separate from the versioned application artifact.
- Documented build and deployment flows for API, database, UI, and supporting components to improve delivery consistency.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
