

RAJENDRA PRASAD N

LEAD DEVOPS ENGINEER | AWS CLOUD, DEVOPS, SRE & KUBERNETES

rajendran.scm@gmail.com
+1 (469) 926-4201
Dallas, TX
linkedin.com/in/rajendranelakurthi
rajendranelakurthi.github.io

Lead DevOps Engineer with more than a decade of enterprise delivery, release engineering, cloud infrastructure, and production operations experience across Linux and Unix environments. Deep hands-on strength in **shell scripting, CI/CD pipeline engineering, infrastructure as code, build and deployment automation, and container orchestration** using Jenkins, GitHub Actions, GitLab CI, Terraform, CloudFormation, Ansible, Bash, Python, Docker, Kubernetes, EKS, and OpenShift. Proven record modernizing application platforms, troubleshooting complex releases, integrating monitoring and security controls, and improving the reliability and repeatability of mission-critical delivery workflows.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

KEY PLATFORM ACHIEVEMENTS

- AWS Platform Engineering** Designed AWS-first infrastructure with Terraform, CloudFormation, and Ansible to standardize provisioning, improve repeatability, and support secure multi-environment delivery.
- Release Engineering** Directed enterprise release orchestration, build automation, change governance, and deployment troubleshooting across AWS, Kubernetes, and mission-critical application platforms.
- Kubernetes Platforms** Delivered containerized workloads on EKS, OpenShift, Rancher, and self-managed Kubernetes environments using Helm, ArgoCD, and repeatable manifest-driven workflows.
- Observability** Implemented CloudWatch, Prometheus, Grafana, Splunk, ELK, and custom telemetry pipelines to improve platform visibility, incident response, and operational diagnosis.
- DevSecOps & Governance** Integrated security scanning, policy-driven controls, IAM, MFA, and secure network patterns into CI/CD and cloud operations to strengthen delivery governance and compliance.

CORE TECHNOLOGIES

INFRASTRUCTURE AS CODE

Terraform, CloudFormation, Ansible, Packer, YAML pipelines, AWS CLI

CI/CD PLATFORMS

Jenkins, GitHub Actions, GitLab CI, AWS CodePipeline, AWS CodeBuild, AWS CodeDeploy, CloudBees, ArgoCD

CLOUD PLATFORMS

AWS, Linode, multi-account landing zones, VPC, Transit Gateway, VPN, Direct Connect, Route 53, ALB, NLB, CloudFront

MONITORING & LOGGING

Amazon CloudWatch, CloudTrail, Grafana, Prometheus, AppDynamics, Splunk, ELK, Fluentd, InfluxDB

OPERATING SYSTEMS

Linux, RHEL, Ubuntu, HP/UX, Windows Server 2012

BUILD TOOLS

ANT, Maven, MSBuild, Make, Gradle

CONTAINERS & ORCHESTRATION

Docker, Docker Swarm, ECS, Kubernetes, Helm, Istio, Consul

MANAGED KUBERNETES

EKS, OpenShift, Rancher, self-managed Kubernetes, hybrid Kubernetes

SOURCE CONTROL & SCM

GitLab, GitHub, Bitbucket, Gerrit, Subversion, TFS

SCRIPTING & PROGRAMMING

Shell, Batch, Python, PowerShell, .NET (C#), Core Java

DATABASES & RELEASE TOOLS

MySQL, PostgreSQL, MongoDB, Amazon RDS, Amazon Aurora, Liquibase, JFrog, SonarQube, Fortify, Black Duck

OTHER PLATFORMS

IIS, Apache Tomcat, JBoss, WebLogic, VMware ESXi, Vagrant, Hyper-V, Vault, datree.io, Amazon ECR

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, AWS CodePipeline, PowerShell, Terraform, EKS, GitHub Actions, Milvus, Helm, Databricks on AWS

- Established Git branching, approval, and artifact versioning standards and integrated DevSecOps controls into release workflows through secure secrets handling, Terraform validation, and pre-deployment policy checks across AWS environments.
- Automated provisioning of Databricks environments on AWS across isolated accounts, standardizing network integration, IAM controls, and environment consistency.
- Standardized deployment pipelines for AWS and hybrid environments, improving release consistency, auditability, and operational reliability.
- Supported Java and Node.js microservices on AWS, improving scalability, runtime stability, and production readiness for cloud-native applications.
- Designed and implemented scalable EKS and Terraform-based infrastructure to support high-throughput vector search platforms powered by Milvus and GPU-enabled workloads.
- Managed self-hosted runners, build agents, and distributed deployment infrastructure to optimize pipeline throughput across controlled compute environments.
- Implemented secure service connectivity using AWS PrivateLink, VPC endpoints, and private networking controls to protect sensitive application traffic.
- Architected and maintained scalable CI/CD pipelines using AWS CodePipeline, GitHub, and reusable deployment workflows to automate build, test, and release execution.
- Directed end-to-end release management across multiple engineering teams by aligning schedules, dependencies, change windows, and risk mitigation plans.
- Delivered release communications, milestone reporting, and risk updates to engineering leadership and business stakeholders to keep delivery streams aligned.
- Authored technical documentation, deployment guides, and operational runbooks to improve knowledge transfer and support readiness.
- Containerized critical microservices and deployed them with Helm and Kubernetes manifests, ensuring consistent runtime behavior across lower and production environments.
- Automated platform operations with Python, Bash, and PowerShell to reduce manual effort and accelerate provisioning, support, and recovery workflows.
- Coordinated incident response and production release support, minimizing downtime and accelerating service restoration during high-priority events.
- Produced solution diagrams, environment specifications, and architecture documentation to improve stakeholder alignment and implementation clarity.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: AWS, GitLab CI, Terraform, Jira, Kubernetes

- Managed Docker image build, provisioning, and runtime administration to standardize containerized delivery workflows.
- Improved Kubernetes release processes by standardizing deployment patterns, secure runner standards, controlled branch protections, container image validation, and pipeline checks across environments.
- Deployed and administered self-hosted and auto-scaling build agents for Linux and Windows workloads to support high-throughput CI/CD operations.
- Configured agent pools, runner templates, and execution policies to improve build reliability and reduce manual pipeline support.
- Created package views, artifact feeds, and upstream repository strategies aligned to application team delivery requirements.
- Administered Kubernetes clusters and deployed applications through pods, deployments, services, and core platform components.
- Migrated Jenkins pipelines to GitLab CI and modernized runner configuration to improve maintainability and pipeline reliability.
- Implemented GitLab CI best practices, including reusable templates, pipeline governance, and controlled branch-based execution.
- Enforced SCM best practices and coached development teams on GitLab workflows, branch governance, and merge standards.
- Troubleshoot pipeline, container, and Kubernetes issues in partnership with development teams to accelerate delivery and reduce deployment failures.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Linode, Python, Terraform, EKS, GitHub Actions, GitLab

- Provisioned AWS infrastructure using CloudFormation, Terraform, and pipeline-driven infrastructure-as-code deployment patterns.
- Implemented disaster recovery, backup, and observability controls using AWS Elastic Disaster Recovery, AWS Backup, and Amazon CloudWatch.
- Published versioned artifacts to enterprise repositories and package managers to support downstream engineering consumption and traceability.
- Designed secure VPC networking, Route 53 DNS, security groups, load balancing, VPN connectivity, Direct Connect, and traffic-routing patterns for enterprise workloads.
- Built dashboards for CI/CD pipelines, work items, and defect tracking to improve engineering visibility and release governance.
- Implemented GitHub Actions workflows for deploying services to Kubernetes clusters across multiple environments.
- Integrated delivery tooling with Slack, Microsoft Teams, Jenkins, GitHub, and SonarQube based on engineering and audit requirements.
- Drove continuous integration and continuous delivery practices using Git, Maven, Jenkins, Ansible, Docker, Kubernetes, and AWS services.
- Authored PowerShell and shell automation scripts and published them to shared repositories for consistent reuse across environments.
- Troubleshoot build and release pipeline failures and resolved deployment issues across distributed engineering teams.
- Deployed and configured self-hosted runners and build agents for Linux and Windows workloads supporting CI/CD and release automation.
- Configured deployment groups and environment-specific release targets to streamline controlled production rollouts.
- Deployed Kubernetes microservices through ArgoCD-based GitOps workflows.
- Established and maintained CI/CD pipelines with Jenkins, Git, Amazon ECR, and Kubernetes for repeatable application delivery.
- Built Docker images and deployed containerized applications to EKS using Helm charts and Kubernetes manifests.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: AWS, Python, Jenkins, GitHub Actions, SonarQube, JFrog, Terraform, Kubernetes, Prometheus, Ansible

- Designed CI/CD pipelines for application and infrastructure deployments across AWS environments.
- Implemented MFA, identity access controls, and role-based access management for users and groups across cloud environments.
- Designed and delivered a Terraform and Kubernetes solution for payment-platform deployments, enabling repeatable infrastructure provisioning and container orchestration.
- Automated onboarding of new projects to the enterprise DevOps platform through API-driven workflows.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise tooling for secure software delivery.
- Authored and enforced custom policy controls aligned to internal security and governance requirements across AWS accounts.
- Applied platform engineering best practices to improve reliability, scalability, and operational efficiency across shared services.
- Authored Helm charts to deploy containerized applications consistently across Kubernetes environments.
- Created architecture and resource diagrams to support compliance reviews, security sign-offs, and controlled release execution.
- Partnered with peers to isolate product defects and participated in retrospectives with development teams and sprint managers to improve release quality.
- Standardized GitHub Actions-based CI/CD patterns to accelerate software delivery and reduce pipeline drift across teams.
- Developed internal APIs in Python FastAPI to integrate Jenkins, Jira, and JFrog processes with platform automation.
- Developed custom Prometheus exporters in Python to capture application-specific operational metrics for SRE use cases.
- Built resilient Ansible roles and playbooks to deploy highly available Grafana, Prometheus, and Node Exporter monitoring stacks.
- Developed Jenkins shared libraries to automate image versioning and publish artifacts to private JFrog repositories.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, AWS, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Worked extensively with AWS infrastructure services including EC2, CloudWatch, Secrets Manager, and managed database platforms for enterprise workloads.
- Represented the DevOps team and presented CI/CD and infrastructure automation strategies for key engineering initiatives, including Model Finder.
- Supported enterprise applications on AWS by troubleshooting CloudWatch, Amazon RDS, load balancing, auto scaling, certificate management, CloudFront, and identity integrations.
- Used CloudFormation and PowerShell scripting to provision and manage cloud resources in a repeatable and auditable manner.
- Automated fleet-level configuration enforcement for Linux and Windows EC2 instances and managed secure access and database connectivity in line with enterprise security standards.
- Led platform review discussions with stakeholders in Germany to present roadmap enhancements and quarterly DevOps priorities.
- Designed monitoring architecture to collect application, infrastructure, and platform metrics using the ELK stack.
- Served as acting scrum master by managing stories, epics, sprint commitments, and core scrum ceremonies.
- Built Kubernetes environments with pods, deployments, services, and ConfigMaps, and managed Helm-based release packaging for multi-namespace workloads.
- Built continuous delivery pipelines and supported REST-based microservices deployments across Demo, Test, Pentest, Training, CTDEV, Sandbox, UAT, and PROD environments.
- Planned and executed migration strategies for traditional workloads to AWS using lift-and-shift and modernization approaches.
- Integrated on-premises identity sources with cloud access controls and strengthened security using privileged access, identity protection, and MFA.
- Supported migration of on-premises Windows Server workloads to AWS and validated post-migration configuration through structured cutover and failover testing.
- Tuned scaling policies and service capacity for application and database workloads during on-premises to AWS migration programs.
- Deployed Kubernetes manifests to on-premises clusters with Helm and standardized release packaging across services.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: AWS, Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Authored and maintained Terraform modules and executed infrastructure changes through automated CI/CD workflows.
- Executed AWS proof-of-concepts and delivered solution designs aligned to application and infrastructure requirements.
- Executed Terraform deployments through pipelines and promoted the same artifact set across multiple environments through controlled environment selection.
- Authored AWS CLI automation to update service configurations and standardize administrative operations.
- Documented build and deployment flows for core infrastructure, API, database, and UI components to improve team consistency.
- Created deployment pipelines with Ansible to promote releases from development through production in a controlled, repeatable manner.
- Built YAML-based build and release pipelines with event-driven triggers to support continuous integration on every code change.
- Built and managed self-hosted build agents to support pipeline execution at scale.
- Defined and implemented branching strategies for Git repositories to improve release governance and code promotion.
- Created CI/CD pipelines for multiple application components across shared delivery platforms.
- Managed variable groups and environment-specific configuration to separate deployments cleanly across stages.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
