rajendranelakurthi.github.io

Lead Build & Release Engineer with 10+ years of experience in software delivery, build automation, and production troubleshooting. Engineers Jenkins pipelines, Python automation, Git release workflows, and Linux build environments to improve developer productivity and release quality. Brings experience with reusable pipeline libraries, artifact repositories, Ansible configuration management, and cross-team issue resolution. Uses AI-assisted engineering with human review to support automation, troubleshooting, and technical documentation.

CERTIFICATIONS

BUILD & RELEASE ENGINEERING HIGHLIGHTS

- Developer Productivity** Developed Python automation and service integrations to streamline project onboarding, pipeline administration, and recurring release tasks.
- Build Automation** Standardized reusable CI/CD workflows, build-agent configuration, artifact publication, and release checks across engineering teams.
- Release Quality** Combined Git controls, versioned artifacts, code-quality checks, troubleshooting, and technical documentation to strengthen repeatable delivery.

BUILD, RELEASE & AUTOMATION SKILLS

AI & ENGINEERING ENABLEMENT GitLab Duo, AI-assisted code and test drafting, human review, data-handling controls, Jira integrations, release documentation, technical runbooks	BUILD & CONTINUOUS INTEGRATION Jenkins, CloudBees Jenkins, Groovy shared libraries, Jenkinsfile, GitLab CI/CD, GitHub Actions, Maven, Gradle, Make, ANT, MSBuild
SCM & ARTIFACT MANAGEMENT Git, branching strategies, merge reviews, release tags, versioned packages, JFrog Artifactory, Nexus, dependency management, reusable build components	INFRASTRUCTURE & CONFIGURATION Ansible roles and playbooks, Terraform, Docker, Kubernetes, Helm, version-controlled infrastructure, repeatable build environments
CODE QUALITY & DIAGNOSTICS SonarQube, JFrog Xray, automated tests, security checks, build logs, pipeline metrics, root cause analysis, defect tracking	AUTOMATION & LINUX Python, FastAPI, Bash, PowerShell, Linux, RHEL, Ubuntu, REST APIs, build agents, environment configuration, diagnostic scripts

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: GitLab, GitLab CI/CD, GitLab Duo, Git, Terraform, Docker, Helm, Bash, Python

- Administered source repositories, protected branches, merge approvals, access controls, and code ownership rules to support shared development and release governance.
- Developed Python and Bash tools for repository bootstrap, pipeline variables, runner setup, and release validation, reducing repetitive developer support work.
- Monitored runner capacity, pipeline duration, failure trends, queue time, cache efficiency, and deployment health to improve GitLab platform reliability and developer productivity.
- Created GitLab platform standards, migration playbooks, runner troubleshooting guides, branching documentation, and operational runbooks for engineering and support teams.
- Integrated GitLab DevSecOps controls into pipelines, including secret detection, dependency and container scanning, SAST, IaC validation, security gates, and policy-driven merge approvals.
- Architected reusable CI/CD templates with staged build execution, artifact retention, dependency caching, environment promotion, and controlled release approvals.
- Designed Git branching strategies covering feature, release, hotfix, and trunk-based workflows, with protected-branch controls and merge standards aligned to release governance and audit requirements.
- Integrated AI-assisted code explanation, test drafting, and documentation into engineering workflows, requiring human review and appropriate data handling.
- Operated Linux build runners with workload-specific pools, isolated execution, and cache configuration; investigated queue time, capacity, and build failures.

Senior DevOps Engineer | [GlobalLogic](#)

03/2023 - 08/2023

Skills Used: GitLab CI, Terraform, Jira, Kubernetes

- Troubleshoot pipeline, container, and Kubernetes issues in partnership with development teams to accelerate delivery and reduce deployment failures.
- Improved Kubernetes release processes by standardizing deployment patterns, secure runner standards, controlled branch protections, container image validation, and pipeline checks across environments.
- Enforced SCM best practices and coached development teams on GitLab workflows, branch governance, and merge standards.
- Deployed and administered self-hosted and auto-scaling build agents for Linux and Windows workloads to support high-throughput CI/CD operations.
- Configured agent pools, runner templates, and execution policies to improve build reliability and reduce manual pipeline support.
- Created package views, artifact feeds, and upstream repository strategies aligned to application team delivery requirements.
- Migrated Jenkins pipelines to GitLab CI and modernized runner configuration to improve maintainability and pipeline reliability.
- Implemented GitLab CI best practices, including reusable templates, pipeline governance, and controlled branch-based execution.
- Managed Docker image build, provisioning, and runtime administration to standardize containerized delivery workflows.

Senior DevOps Engineer II | [Akamai Technologies](#)

12/2021 - 03/2023

Skills Used: Python, Terraform, GitHub Actions, GitLab

- Troubleshoot build and release pipeline failures and resolved deployment issues across distributed engineering teams.
- Deployed and configured self-hosted runners and build agents for Linux and Windows workloads supporting CI/CD and release automation.
- Built dashboards for CI/CD pipelines, work items, and defect tracking to improve engineering visibility and release governance.
- Established and maintained CI/CD pipelines with Jenkins, Git, Amazon ECR, and Kubernetes for repeatable application delivery.
- Configured deployment groups and environment-specific release targets to streamline controlled production rollouts.
- Drove continuous integration and continuous delivery practices using Git, Maven, Jenkins, Ansible, Docker, Kubernetes, and AWS services.
- Authored PowerShell and shell automation scripts and published them to shared repositories for consistent reuse across environments.
- Integrated delivery tooling with Slack, Microsoft Teams, Jenkins, GitHub, and SonarQube based on engineering and audit requirements.
- Published versioned artifacts to enterprise repositories and package managers to support downstream engineering consumption and traceability.

Senior DevOps Engineer / Senior SRE | [Turvo India Pvt Ltd](#)

04/2020 - 12/2021

Skills Used: Python, Jenkins, GitHub Actions, SonarQube, JFrog, Terraform, Kubernetes, Prometheus, Ansible

- Partnered with peers to isolate product defects and participated in retrospectives with development teams and sprint managers to improve release quality.
- Developed Jenkins Groovy shared libraries for image versioning and artifact publication to private JFrog repositories, enabling reuse across application pipelines.
- Designed CI/CD pipelines for application and infrastructure deployments across AWS environments.
- Standardized GitHub Actions-based CI/CD patterns to accelerate software delivery and reduce pipeline drift across teams.
- Developed internal APIs in Python FastAPI to integrate Jenkins, Jira, and JFrog processes with platform automation.
- Automated onboarding of new projects to the enterprise DevOps platform through API-driven workflows.
- Developed custom Prometheus exporters in Python to capture application-specific operational metrics for SRE use cases.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise tooling for secure software delivery.
- Built resilient Ansible roles and playbooks to deploy highly available Grafana, Prometheus, and Node Exporter monitoring stacks.

Senior DevOps Engineer | [HCL Technologies](#)

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Represented the DevOps team and presented CI/CD and infrastructure automation strategies for key engineering initiatives, including Model Finder.
- Built continuous delivery pipelines and supported REST-based microservices deployments across Demo, Test, Pentest, Training, CTDEV, Sandbox, UAT, and PROD environments.
- Designed monitoring architecture to collect application, infrastructure, and platform metrics using the ELK stack.
- Deployed Kubernetes manifests to on-premises clusters with Helm and standardized release packaging across services.
- Led platform review discussions with stakeholders in Germany to present roadmap enhancements and quarterly DevOps priorities.
- Served as acting scrum master by managing stories, epics, sprint commitments, and core scrum ceremonies.
- Built Kubernetes environments with pods, deployments, services, and ConfigMaps, and managed Helm-based release packaging for multi-namespace workloads.
- Used CloudFormation and PowerShell scripting to provision and manage cloud resources in a repeatable and auditable manner.
- Automated fleet-level configuration enforcement for Linux and Windows EC2 instances and managed secure access and database connectivity in line with enterprise security standards.

DevOps Engineer | [Mphasis Ltd](#)

08/2016 - 12/2018

Client: HPE

Skills Used: Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Built YAML-based build and release pipelines with event-driven triggers to support continuous integration on every code change.
- Created deployment pipelines with Ansible to promote releases from development through production in a controlled, repeatable manner.
- Created CI/CD pipelines for multiple application components across shared delivery platforms.
- Executed Terraform deployments through pipelines and promoted the same artifact set across multiple environments through controlled environment selection.
- Authored and maintained Terraform modules and executed infrastructure changes through automated CI/CD workflows.
- Defined and implemented branching strategies for Git repositories to improve release governance and code promotion.
- Built and managed self-hosted build agents to support pipeline execution at scale.
- Documented build and deployment flows for core infrastructure, API, database, and UI components to improve team consistency.
- Managed variable groups and environment-specific configuration to separate deployments cleanly across stages.

EDUCATION

B.Tech (2009-2013) in Information Technology
Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
