rajendranelakurthi.github.io

Lead AWS DevOps Engineer with 10+ years of enterprise cloud engineering, automated delivery, and production operations experience. Hands-on strength in **Amazon S3, VPC networking, IAM, Terraform, CloudFormation, and CI/CD**. Builds repeatable AWS infrastructure and release workflows with secure access, private service connectivity, monitoring, and recovery planning. Automates provisioning and operational support with Python, Bash, PowerShell, and AWS CLI while coordinating engineering teams through production releases and incident resolution.

CERTIFICATIONS

AWS Certified Solutions Architect - Associate

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

MuleSoft Certified Developer - Level 1

AWS PLATFORM & DELIVERY HIGHLIGHTS

- Secure AWS Infrastructure** Designed repeatable AWS provisioning with Terraform and CloudFormation, integrating IAM controls, VPC networking, and private service connectivity.
- Pipeline Automation** Built reusable application and infrastructure delivery workflows with deployment checks, versioned artifacts, approvals, and environment promotion.
- Production Reliability** Combined cloud monitoring, operational automation, incident response, and recovery runbooks to support enterprise application platforms.

CORE TECHNOLOGIES

AMAZON S3 & AWS SERVICES

Amazon S3, EC2, EKS, ECR, RDS, Lambda, AWS CLI, cloud resource administration

IAM & SECURITY

IAM roles and policies, least privilege, MFA, Secrets Manager, private networking, secure pipeline credentials, policy checks

VPC & NETWORKING

VPC, subnets, route tables, security groups, Route 53, ALB/NLB, VPN, Direct Connect, PrivateLink, VPC endpoints

CI/CD & WORKFLOW AUTOMATION

AWS CodePipeline, CodeBuild, CodeDeploy, Jenkins, GitHub Actions, GitLab CI, job dependencies, approvals, deployment verification

OBSERVABILITY & RECOVERY

CloudWatch, CloudTrail, Prometheus, Grafana, Splunk, ELK, AWS Backup, Elastic Disaster Recovery, incident troubleshooting

SCRIPTING & SYSTEMS

Python, Bash, PowerShell, AWS CLI, Linux, Windows Server, REST APIs, FastAPI, operational runbooks

INFRASTRUCTURE AS CODE

Terraform, reusable modules, CloudFormation, Ansible, Packer, version-controlled infrastructure, environment configuration

CONTAINERS & DELIVERY QUALITY

Docker, Kubernetes, EKS, Helm, ArgoCD, Git, SonarQube, JFrog Artifactory, Xray, release governance

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, AWS CodePipeline, PowerShell, Terraform, EKS, GitHub Actions, Milvus, Helm, Databricks on AWS

- Implemented secure service connectivity using AWS PrivateLink, VPC endpoints, and private networking controls to protect sensitive application traffic.
- Architected and maintained scalable CI/CD pipelines using AWS CodePipeline, GitHub, and reusable deployment workflows to automate build, test, and release execution.
- Standardized deployment pipelines for AWS and hybrid environments, improving release consistency, auditability, and operational reliability.
- Automated provisioning of Databricks environments on AWS across isolated accounts, standardizing network integration, IAM controls, and environment consistency.
- Established Git branching, approval, and artifact versioning standards and integrated DevSecOps controls into release workflows through secure secrets handling, Terraform validation, and pre-deployment policy checks across AWS environments.
- Automated platform operations with Python, Bash, and PowerShell to reduce manual effort and accelerate provisioning, support, and recovery workflows.
- Designed and implemented scalable EKS and Terraform-based infrastructure to support high-throughput vector search platforms powered by Milvus and GPU-enabled workloads.
- Coordinated incident response and production release support, minimizing downtime and accelerating service restoration during high-priority events.
- Authored technical documentation, deployment guides, and operational runbooks to improve knowledge transfer and support readiness.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: AWS, GitLab CI, Terraform, Jira, Kubernetes

- Improved Kubernetes release processes by standardizing deployment patterns, secure runner standards, controlled branch protections, container image validation, and pipeline checks across environments.
- Migrated Jenkins pipelines to GitLab CI and modernized runner configuration to improve maintainability and pipeline reliability.
- Deployed and administered self-hosted and auto-scaling build agents for Linux and Windows workloads to support high-throughput CI/CD operations.
- Managed Docker image build, provisioning, and runtime administration to standardize containerized delivery workflows.
- Administered Kubernetes clusters and deployed applications through pods, deployments, services, and core platform components.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Linode, Python, Terraform, EKS, GitHub Actions, GitLab

- Designed secure VPC networking, Route 53 DNS, security groups, load balancing, VPN connectivity, Direct Connect, and traffic-routing patterns for enterprise workloads.
- Provisioned AWS infrastructure using CloudFormation, Terraform, and pipeline-driven infrastructure-as-code deployment patterns.
- Implemented disaster recovery, backup, and observability controls using AWS Elastic Disaster Recovery, AWS Backup, and Amazon CloudWatch.
- Implemented GitHub Actions workflows for deploying services to Kubernetes clusters across multiple environments.
- Built Docker images and deployed containerized applications to EKS using Helm charts and Kubernetes manifests.
- Authored PowerShell and shell automation scripts and published them to shared repositories for consistent reuse across environments.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: AWS, Python, Jenkins, GitHub Actions, SonarQube, JFrog, Terraform, Kubernetes, Prometheus, Ansible

- Designed CI/CD pipelines for application and infrastructure deployments across AWS environments.
- Authored and enforced custom policy controls aligned to internal security and governance requirements across AWS accounts.
- Designed and delivered a Terraform and Kubernetes solution for payment-platform deployments, enabling repeatable infrastructure provisioning and container orchestration.
- Implemented MFA, identity access controls, and role-based access management for users and groups across cloud environments.
- Developed internal APIs in Python FastAPI to integrate Jenkins, Jira, and JFrog processes with platform automation.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise tooling for secure software delivery.
- Developed custom Prometheus exporters in Python to capture application-specific operational metrics for SRE use cases.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, AWS, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Supported enterprise applications on AWS by troubleshooting CloudWatch, Amazon RDS, load balancing, auto scaling, certificate management, CloudFront, and identity integrations.
- Worked extensively with AWS infrastructure services including EC2, CloudWatch, Secrets Manager, and managed database platforms for enterprise workloads.
- Planned and executed migration strategies for traditional workloads to AWS using lift-and-shift and modernization approaches.
- Automated fleet-level configuration enforcement for Linux and Windows EC2 instances and managed secure access and database connectivity in line with enterprise security standards.
- Used CloudFormation and PowerShell scripting to provision and manage cloud resources in a repeatable and auditable manner.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: AWS, Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Authored AWS CLI automation to update service configurations and standardize administrative operations.
- Created deployment pipelines with Ansible to promote releases from development through production in a controlled, repeatable manner.
- Created CI/CD pipelines for multiple application components across shared delivery platforms.
- Authored and maintained Terraform modules and executed infrastructure changes through automated CI/CD workflows.
- Managed variable groups and environment-specific configuration to separate deployments cleanly across stages.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
