rajendranelakurthi.github.io

DevOps Engineer with 10+ years of experience delivering CI/CD, cloud infrastructure, and production support, partnering closely with development teams to improve SaaS delivery and day-to-day engineering productivity. Hands-on background in **CloudBees CI (Jenkins Enterprise), Jenkins Pipelines, Python, Groovy shared libraries, Docker, Kubernetes, Helm, ArgoCD, Terraform, and Ansible**. Builds reusable delivery workflows and self-service platform automation with **AWS and Azure**. Owns technical delivery from requirements and planning through implementation, rollout, documentation, and operational support.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

KEY PLATFORM ACHIEVEMENTS

- Developer Enablement** Built reusable pipelines, onboarding APIs, and deployment guidance that let application teams deliver services with less platform intervention.
- Enterprise CI** Administered CloudBees Jenkins and JFrog tooling; developed shared libraries for consistent image versioning and artifact publication.
- SaaS Reliability** Combined Kubernetes delivery, infrastructure automation, observability, and incident response to improve service readiness and release confidence.

CORE TECHNOLOGIES

CI/CD & SOFTWARE BUILD

CloudBees CI (Jenkins Enterprise), Jenkinsfile, Groovy shared libraries, GitHub Actions, GitLab CI, Maven, Gradle, SDLC

CLOUD & INFRASTRUCTURE

AWS: EKS, EC2, ECR, VPC, IAM, S3, RDS, CloudWatch; Azure, AKS, Azure DevOps

CONTAINERS & LINUX

Docker, Kubernetes, Helm, ArgoCD, Linux, RHEL, Ubuntu, VMware, clustered compute, autoscaling

INFRASTRUCTURE & SELF-SERVICE

Terraform, CloudFormation, Ansible, Python, Bash, FastAPI, REST APIs, reusable modules, developer onboarding

BUILD QUALITY & SECURITY

JFrog Artifactory, Xray, Nexus, SonarQube, test reports, artifact promotion, Vault, AWS Secrets Manager, Git

OPERATIONS & DEVELOPMENT

Python services, Java microservices, Prometheus, Grafana, CloudWatch, incident response, runbooks, AI-assisted automation

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, Azure, EKS, Terraform, Python, Docker, Helm, GitHub Actions

- Owned platform deliveries for SaaS-style application services, translating developer requirements into implementation plans, reusable automation, rollout criteria, and production support procedures.
- Built AWS-first CI/CD workflows with CodePipeline and GitHub Actions for Java and Node.js microservices, standardizing build, test, image publication, and deployment stages with development teams.
- Delivered reusable Terraform modules and EKS environment patterns so teams could provision consistent infrastructure through reviewed changes; supported Azure delivery environments.
- Containerized microservices with Docker and deployed versioned Helm releases, aligning application configuration, service dependencies, health checks, and rollback procedures across environments.
- Automated provisioning, diagnostics, and recovery tasks in Python and Bash; maintained Linux build agents and distributed execution capacity for concurrent engineering workloads.
- Integrated secrets handling, Terraform validation, image checks, and approval gates into developer workflows to detect release risks before production deployment.
- Operated EKS infrastructure for Milvus and GPU-enabled services, partnering with application teams on capacity, workload isolation, private connectivity, and production readiness.
- Coordinated high-priority incident response and release support, converting recurring failures into automation, runbooks, and actionable engineering improvements.
- Applied AI-assisted techniques to draft automation, explain pipeline failures, and develop troubleshooting guidance, validating generated changes through review and testing.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: AWS, Azure, Jenkins, GitLab CI, Linux, Docker, Kubernetes

- Partnered with SaaS development teams to resolve build, container, and deployment failures and simplify daily delivery across AWS and Azure environments.
- Operated Linux and Windows build-agent pools with reusable runner templates and execution policies, improving consistency for parallel CI workloads.
- Modernized Jenkins workflows into reusable GitLab CI templates while preserving application build, test, artifact publication, and release requirements.
- Standardized Docker images, Kubernetes deployment patterns, branch protections, and image-validation checks to make releases easier for developers to troubleshoot.
- Organized artifact feeds and repository consumption patterns and coached engineers on merge workflows, pipeline ownership, and environment promotion.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Azure, Jenkins, EKS, Terraform, ArgoCD, Helm, Ansible

- Built Jenkins and GitHub Actions pipelines for cloud-hosted microservices, integrating Maven builds, automated checks, ECR image publication, and Kubernetes delivery.
- Delivered AWS infrastructure with Terraform and CloudFormation; supported Azure workloads while keeping application delivery patterns reusable.
- Implemented ArgoCD GitOps workflows and Helm packaging for EKS services, giving developers version-controlled deployments and clear rollback paths.
- Maintained Linux build runners and automated environment configuration with Ansible and scripts to keep build dependencies and execution environments consistent.
- Published versioned binaries and container images to shared repositories and integrated SonarQube feedback into engineering workflows.
- Partnered with distributed development teams on release failures and service reliability, using CloudWatch dashboards, backup controls, and operational documentation.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: AWS, Azure, CloudBees CI, Groovy, Python / FastAPI, JFrog, Terraform, Kubernetes

- Administered CloudBees CI (Jenkins Enterprise), JFrog Artifactory, and Xray for SaaS product engineering, supporting reliable builds, secure artifact storage, and release execution.
- Developed Groovy Jenkins shared libraries for image versioning and artifact publishing, allowing developers to reuse tested pipeline steps across services.
- Developed Python FastAPI services integrating Jenkins, Jira, and JFrog to automate project onboarding and provide self-service access to delivery workflows.
- Partnered with microservice developers on build dependencies, unit and integration test stages, test-result publication, and repeatable promotion of release artifacts.
- Provisioned AWS-first application infrastructure with Terraform and Ansible, with Azure supporting delivery integrations.
- Authored Docker and Helm deployment patterns for Kubernetes services, including payment-platform workloads, to standardize configuration and application rollout.
- Built Python Prometheus exporters and highly available monitoring stacks with Ansible, Grafana, and Node Exporter to expose application and platform health.
- Worked with developers during production incidents, defect isolation, and sprint retrospectives; turned recurring support issues into platform fixes and reusable guidance.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: AWS, Azure, Jenkins, Maven, Ansible, Kubernetes, Helm

- Partnered with application developers and engineering stakeholders on CI/CD improvements for shared software services, translating roadmap priorities into delivery work.
- Built Jenkins and Maven delivery workflows for REST microservices across test, security-validation, UAT, and production environments.
- Packaged Kubernetes applications with Helm and managed namespaces, services, and configuration for repeatable deployments across shared clusters.
- Supported AWS-first infrastructure and Azure integrations, automating Linux configuration and troubleshooting compute, databases, load balancing, and secrets access.
- Implemented ELK operational visibility and documented environment and release procedures to help developers diagnose application and platform issues.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: AWS, Azure, Terraform, Ansible, Python, Linux, Nexus

- Built CI/CD workflows for API, database, and UI components with development teams, standardizing build dependencies and release promotion for shared application services.
- Provisioned AWS infrastructure through Terraform and automated Linux configuration and deployment with Ansible, supporting Azure environments.
- Maintained build agents and Python and shell automation to keep software builds repeatable and simplify infrastructure administration.
- Defined Git branching practices, versioned artifacts, and environment-specific configuration so developers could promote consistent releases from development through production.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
