rajendranelakurthi.github.io

Release & Deployment Engineer with 10+ years of experience in software delivery, DevOps, and production support.

Coordinates releases across development, test, staging, and production, combining **Azure DevOps, Jenkins, Git, and deployment automation** with environment readiness, ServiceNow change requests, CAB coordination, ITIL processes, validation, and rollback planning. Automates operational tasks with PowerShell, Python, and Bash; troubleshoots deployment failures and supports incident recovery. Partners with Development, QA, Infrastructure, Security, and business stakeholders to deliver controlled releases with clear communication and operational evidence.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

RELEASE EXECUTION & PRODUCTION RELIABILITY HIGHLIGHTS

- Controlled Releases** Supported ServiceNow change requests and CAB approval coordination, aligning risk assessments, implementation plans, validation evidence, and rollback procedures with ITIL processes.
- Production Support** Investigated deployment failures, coordinated incident response, and converted recurring issues into documented fixes and improved release procedures.
- Delivery Automation** Built reusable CI/CD workflows and Python, PowerShell, and Bash utilities for repeatable deployments and operational checks.

RELEASE, DEPLOYMENT & OPERATIONS SKILLS

RELEASE & DEPLOYMENT MANAGEMENT

ServiceNow change requests, ITIL change/release processes, CAB approvals, release calendars, readiness reviews, deployment sequencing, rollback plans, release notes

PRODUCTION SUPPORT & OBSERVABILITY

Azure Monitor, CloudWatch, Splunk, ELK, AppDynamics, Prometheus, Grafana, smoke tests, incident triage, root cause analysis, recovery runbooks

CI/CD & SOURCE CONTROL

Azure DevOps, Azure Pipelines, Jenkins, GitHub Actions, GitLab CI/CD, YAML, Git, pull requests, branch protection, release tags, pipeline maintenance

CLOUD & ENVIRONMENT MANAGEMENT

Azure, AWS, Terraform, Ansible, Docker, Kubernetes, Helm, environment configuration, secrets, deployment targets, infrastructure validation

ARTIFACTS, QUALITY & GOVERNANCE

Artifactory, Nexus, SonarQube, JFrog Xray, versioned packages, security checks, release evidence, access controls, audit readiness, operational documentation

SCRIPTING & AUTOMATION

PowerShell, Python, Bash, shell scripting, REST APIs, FastAPI, configuration checks, release status reporting, deployment verification

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: Azure DevOps, Git, AWS, Python, PowerShell, Bash, Terraform, Kubernetes

- Coordinated smoke tests and post-release monitoring; triaged deployment failures and production incidents with application and infrastructure owners.
- Coordinated release scope, schedules, dependencies, implementation steps, and production readiness with Development, QA, Infrastructure, Security, and business stakeholders.
- Built and maintained Azure DevOps and Git-based delivery workflows with build, test, packaging, environment promotion, and post-deployment validation stages.
- Prepared deployment plans covering artifact versions, environment prerequisites, execution order, owners, smoke tests, and rollback criteria.
- Supported change reviews with technical risk assessments, dependency checks, test evidence, and recovery procedures before approved deployment windows.
- Automated configuration checks, release preparation, deployment verification, and operational tasks using PowerShell, Python, and Bash.
- Validated environment configuration, secrets access, infrastructure changes, and application dependencies before promoting releases into production.
- Maintained release schedules and communicated readiness, blockers, approval status, and deployment progress to engineering and support teams.
- Maintained Git branch protections, reviewed changes, artifact versioning, and security checks to preserve traceability throughout release execution.
- Authored deployment guides and operational runbooks; documented root causes and incorporated incident lessons into release checks and recovery procedures.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: Jenkins, GitLab CI, Git, Linux, Docker, Kubernetes

- Supported releases across development, QA, staging, and production, coordinating build readiness and deployment handoffs with application teams.
- Modernized Jenkins workflows into reusable GitLab CI pipelines while preserving build, test, packaging, and deployment requirements.
- Maintained environment-specific variables and release configuration to keep deployment inputs consistent across stages.
- Coordinated readiness checks and test evidence with QA and developers before environment promotion.
- Organized artifact feeds and package versions, ensuring teams promoted the intended release package and dependencies.

- Troubleshoot pipeline, container, and Kubernetes deployment failures and verified corrective actions with service owners.
- Documented release procedures, known issues, and operational handoffs to support repeatable delivery.
- Administered Linux and Windows build agents, resolving runner capacity, workspace, dependency, and credential failures.
- Applied branch protection, merge controls, and image-validation checks before application deployment.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: Jenkins, GitHub Actions, AWS, Terraform, PowerShell, CloudWatch

- Built Jenkins and GitHub Actions pipelines for repeatable build, test, packaging, and application deployment workflows.
- Configured deployment groups and environment-specific release targets for controlled production rollouts.
- Created release documentation and recovery guidance, incorporating monitoring and backup controls into operational readiness.
- Coordinated infrastructure and application dependencies, deployment sequencing, and readiness checks with distributed engineering teams.
- Provisioned AWS environments with Terraform and integrated infrastructure validation into CI/CD execution.
- Automated recurring deployment and operational checks with PowerShell, Python, and shell scripts.
- Investigated deployment failures using pipeline logs and platform telemetry; coordinated recovery and post-deployment validation.
- Published versioned artifacts and maintained package-consumption patterns for traceable release promotion.
- Maintained release dashboards and defect-tracking visibility to communicate build health, blockers, and deployment status.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: Python, Jenkins, GitHub Actions, SonarQube, JFrog, Terraform, Kubernetes, Prometheus, Ansible

- Administered CloudBees Jenkins, JFrog Artifactory, and Xray to support controlled builds, secure packages, and production delivery.
- Provisioned deployment infrastructure using Terraform and Ansible and maintained environment configuration for Kubernetes workloads.
- Coordinated application and infrastructure delivery for SaaS and payment-platform workloads, aligning deployment dependencies and release readiness.
- Built Python FastAPI integrations between Jenkins, Jira, and JFrog to automate onboarding and release coordination.
- Standardized CI/CD stages for build, testing, quality checks, and artifact promotion with development teams.
- Used Prometheus and Grafana telemetry to assess platform health and investigate issues during production support.
- Partnered with developers on defect isolation, incident recovery, and post-release reviews.
- Documented corrective actions and reusable runbooks to reduce recurring support effort and improve release reliability.
- Developed Groovy shared libraries for consistent image versioning and artifact publication across services.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Coordinated release configuration and deployment readiness with developers, QA, and infrastructure stakeholders.
- Built Jenkins and Maven delivery workflows for REST services across test, security-validation, UAT, and production.
- Maintained Helm packages and Kubernetes configuration for repeatable deployment across environments.
- Used ELK and cloud monitoring to investigate application and infrastructure failures affecting releases.
- Supported production deployment windows, application checks, and issue escalation with engineering teams.
- Automated infrastructure provisioning and configuration with PowerShell, Ansible, and version-controlled definitions.
- Validated application connectivity, credentials, and environment prerequisites before release execution.
- Documented deployment sequences, recovery procedures, and environment dependencies for operations handoff.
- Communicated platform priorities and release improvements to distributed stakeholders through technical reviews.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Managed environment-specific variables and configuration for development, test, and production deployments.
- Implemented Git branching practices and release versioning to control code promotion and package traceability.
- Validated release artifacts and prerequisites before controlled environment promotion.
- Automated deployment tasks using Python, shell scripts, and Ansible to reduce manual release preparation.
- Provisioned AWS infrastructure with Terraform and promoted reviewed infrastructure changes through pipelines.
- Investigated failed deployments with development and support teams and verified corrective actions.
- Authored deployment guides and operational handoff documentation for application and infrastructure releases.
- Created build and deployment workflows for API, database, and UI components across shared delivery environments.
- Maintained build agents and resolved dependency and execution-environment failures.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
