rajendranelakurthi.github.io

Lead DevOps Engineer with 10+ years of experience in CI/CD automation, Azure infrastructure, and production release delivery. Experience migrating Jenkins pipelines to **GitLab CI**, building reusable **Azure DevOps** workflows, and automating release and onboarding tasks with **Python, Bash, and PowerShell**. Partners with application developers and QA to manage build dependencies, versioned artifacts, environment configuration, deployment approvals, and production verification. GitLab Certified Associate with hands-on pipeline migration and build troubleshooting experience.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

KEY PLATFORM ACHIEVEMENTS

- **Pipeline Migration** Migrated Jenkins pipelines to GitLab CI and supported source review, automated validation, and release traceability.
- **Azure DevOps Delivery** Built reusable application delivery workflows with review checks, environment approvals, and versioned release artifacts.
- **Python Automation** Developed release checks and FastAPI integrations for Jenkins, Jira, and JFrog to automate onboarding and release coordination.

CORE TECHNOLOGIES

CI/CD & PIPELINE MIGRATION

GitLab CI, Jenkins-to-GitLab pipeline migration, Azure DevOps (AZDO), GitHub Actions, reusable workflows, build automation, deployment approvals

PYTHON & AUTOMATION

Python, FastAPI, Bash, PowerShell, Azure CLI, onboarding automation, pre-deployment checks, smoke tests

SOURCE CONTROL & RELEASE DELIVERY

Git, pull requests, branch protection, merge controls, Maven, JFrog Artifactory, artifact versioning, SonarQube, SDLC

AZURE & INFRASTRUCTURE

Azure, Terraform, ARM templates, Ansible, virtual networks, Key Vault, Microsoft Entra ID, RBAC; additional cloud experience: AWS

CONTAINERS & OPERATIONS

AKS, Kubernetes, Docker, Azure Container Registry, Helm, ArgoCD, Linux, Azure Monitor, Log Analytics, Prometheus, Grafana

DATABASE RELEASE INTEGRATION

Liquibase, Snowflake, SQL, version-controlled schema changes, validation, deployment history, rollback procedures

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: Azure, Azure DevOps, Python, PowerShell, GitHub Actions, Terraform, AKS, Key Vault

- Built reusable GitHub Actions and Azure DevOps workflows for application builds and Liquibase deployments, using pull request checks, environment approvals, and versioned release artifacts.
- Owned CI/CD delivery for SaaS application and database releases, coordinating development, QA, and data engineering requirements, dependencies, release windows, and production verification.
- Developed Python, Bash, and PowerShell automation for pre-deployment checks, database connectivity validation, deployment summaries, and post-release smoke tests.
- Established GitHub repository conventions, branch protections, required reviews, and merge controls so application and database changes remained traceable to approved pull requests.
- Provisioned Azure virtual networks, compute, and AKS infrastructure with Terraform; integrated Key Vault and federated pipeline authentication and published Docker images to Azure Container Registry.
- Troubleshot failed migrations, Snowflake permissions, and pipeline failures using deployment logs and Azure Monitor; coordinated recovery with application owners and preserved release evidence.
- Managed Liquibase changelogs and ordered changesets in Git, validating syntax and reviewing generated SQL before promoting schema changes through development, QA, and production.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: Azure, GitLab CI, Jenkins, Git, Docker, Kubernetes, Liquibase, Snowflake

- Migrated Jenkins build and deployment pipelines to GitLab CI, adapting existing pipeline stages and supporting automated validation and release traceability.
- Partnered with developers and QA on Azure-hosted application delivery, standardizing build-agent configuration, reusable pipeline stages, environment settings, and release checks.
- Troubleshot Liquibase validation errors, Snowflake role permissions, and SQL deployment failures alongside Docker, Kubernetes, and runner issues with engineering teams.
- Managed Liquibase changelogs in Git and automated Snowflake schema deployments through reviewed pipeline stages, separating development, QA, and production configuration.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: Azure, Snowflake, Liquibase, GitHub Actions, Terraform, AKS, Python

- Built GitHub Actions and Jenkins pipelines for application and database releases, coordinating schema updates with service rollout and post-deployment validation.
- Integrated Liquibase validation and update stages for Snowflake schema changes, maintaining migration history, explicit rollback scripts, and reviewed environment promotion.
- Provisioned Azure infrastructure through Terraform and ARM templates and deployed containerized services to AKS with Helm and ArgoCD.
- Automated release checks and operational tasks using Python, Bash, and PowerShell; published versioned artifacts for repeatable downstream deployment.
- Used Azure Monitor, Log Analytics, and pipeline telemetry to investigate slow deployments, infrastructure failures, and application connectivity issues with development teams.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: Azure, Snowflake, Liquibase, GitHub Actions, Jenkins, Python, JFrog, Terraform, AKS

- Standardized GitHub Actions and Jenkins workflows for build, test, artifact publication, and environment promotion, integrating SonarQube and secure secrets handling.
- Developed Python FastAPI integrations for Jenkins, Jira, and JFrog to automate onboarding and reduce manual coordination of release activities.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray, maintaining reusable shared libraries and consistent artifact versioning.
- Delivered CI/CD automation for SaaS services and payment-platform workloads, aligning application releases, database dependencies, and infrastructure changes.
- Built Terraform modules for Azure networking and AKS, standardized Helm deployments and Ansible configuration, and used Prometheus and Grafana to support incident diagnosis.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Azure, Snowflake, Liquibase, Jenkins, ARM templates, Ansible, PowerShell, Helm

- Built Jenkins and Maven delivery pipelines for REST microservices across test, security-validation, UAT, and production environments.
- Automated Azure virtual machines, virtual networks, and Linux configuration with ARM templates, Ansible, and PowerShell; managed Key Vault integration and secure database connectivity.
- Packaged Kubernetes services with Helm and used ELK, Azure Monitor, and Log Analytics to troubleshoot deployment and application failures.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: Azure, Snowflake, Liquibase, Git, Terraform, ARM templates, Ansible, Python, SQL

- Created repeatable build and deployment pipelines for API, database, and UI components, promoting consistent artifacts across development and production.
- Automated Azure infrastructure with Terraform and ARM templates and application deployments with Ansible, Python, and PowerShell, keeping configuration consistent across environments.
- Managed build agents, release parameters, and deployment documentation, troubleshooting failed releases with development and operations teams.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
