rajendranelakurthi.github.io

Lead GitLab and DevOps Engineer with more than a decade of enterprise platform, release engineering, cloud infrastructure, and production operations experience. Hands-on expertise administering GitLab delivery workflows, migrating Azure DevOps and Jenkins pipelines to GitLab CI/CD, operating self-hosted and autoscaling runners, building reusable pipeline templates, and enforcing branch protection, merge, approval, artifact, and repository governance standards. Experienced implementing **GitLab Duo** for AI-assisted development with security, review, and adoption guardrails. Deep strength in **Linux, shell automation, Terraform, AWS, Azure, Docker, Kubernetes, EKS, OpenShift, and DevSecOps controls**, with experience supporting GPU-enabled and vector-search platforms for AI-oriented workloads. Proven record improving pipeline security, reliability, scalability, and developer delivery efficiency.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

KEY PLATFORM ACHIEVEMENTS

- **GitHub Automation** Standardized reusable workflows, pull request checks, branching practices, and controlled promotion across development, QA, and production.
- **Database Delivery** Integrated version-controlled database changes with application releases, validation gates, deployment evidence, and recovery procedures.
- **Azure & DataOps** Connected Azure provisioning, cloud data-platform delivery, and operational monitoring to improve release consistency and developer productivity.

CORE TECHNOLOGIES

GITHUB & CI/CD

GitHub repositories, GitHub Actions, pull requests, branch protection, merge strategies, reusable workflows, Jenkins, Azure DevOps

RELEASE QUALITY & OPERATIONS

DataOps, integration testing, deployment approvals, artifact management, SonarQube, Azure Monitor, Log Analytics, Prometheus, Grafana, Splunk

SNOWFLAKE & DATA PLATFORMS

Snowflake, databases, schemas, virtual warehouses, RBAC, SQL deployment, query history, resource monitors; Azure SQL Database, PostgreSQL, MySQL

CLOUD & INFRASTRUCTURE AS CODE

Azure, Terraform, ARM templates, Ansible, virtual networks, Azure Key Vault, Microsoft Entra ID, RBAC; additional cloud experience: AWS

SCRIPTING & CONTAINERS

PowerShell, Python, Bash, Azure CLI, Linux, Docker, Kubernetes, AKS, Azure Container Registry, Helm, ArgoCD

DATABASE CHANGE MANAGEMENT

Liquibase, changelogs, changesets, SQL, schema versioning, validation, deployment history, rollback scripts

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: Azure, Azure DevOps, GitHub Actions, Liquibase, Snowflake, Terraform, AKS, Key Vault, PowerShell

- Owned CI/CD delivery for SaaS application and database releases, coordinating development, QA, and data engineering requirements, dependencies, release windows, and production verification.
- Built reusable GitHub Actions and Azure DevOps workflows for application builds and Liquibase deployments, using pull request checks, environment approvals, and versioned release artifacts.
- Troubleshot failed migrations, Snowflake permissions, and pipeline failures using deployment logs and Azure Monitor; coordinated recovery with application owners and preserved release evidence.
- Developed Python, Bash, and PowerShell automation for pre-deployment checks, database connectivity validation, deployment summaries, and post-release smoke tests.
- Automated Snowflake SQL deployments for databases, schemas, tables, views, and grants, separating environment configuration from version-controlled migration logic.
- Provisioned Azure virtual networks, compute, and AKS infrastructure with Terraform; integrated Key Vault and federated pipeline authentication and published Docker images to Azure Container Registry.
- Managed Liquibase changelogs and ordered changesets in Git, validating syntax and reviewing generated SQL before promoting schema changes through development, QA, and production.
- Configured Snowflake roles and warehouse settings, using least-privilege deployment access, auto-suspend, resource monitors, and query history to support secure and efficient operations.
- Established GitHub repository conventions, branch protections, required reviews, and merge controls so application and database changes remained traceable to approved pull requests.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: Azure, Snowflake, Liquibase, GitHub, GitLab CI, Jenkins, Docker, Kubernetes

- Migrated Jenkins pipelines to GitLab CI and supported GitHub integration patterns for source review, automated validation, and release traceability.
- Partnered with developers and QA on Azure-hosted application delivery, standardizing build-agent configuration, reusable pipeline stages, environment settings, and release checks.
- Managed Liquibase changelogs in Git and automated Snowflake schema deployments through reviewed pipeline stages, separating development, QA, and production configuration.
- Troubleshot Liquibase validation errors, Snowflake role permissions, and SQL deployment failures alongside Docker, Kubernetes, and runner issues with engineering teams.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: Azure, Snowflake, Liquibase, GitHub Actions, Terraform, AKS, Python

- Used Azure Monitor, Log Analytics, and pipeline telemetry to investigate slow deployments, infrastructure failures, and application connectivity issues with development teams.
- Built GitHub Actions and Jenkins pipelines for application and database releases, coordinating schema updates with service rollout and post-deployment validation.
- Automated release checks and operational tasks using Python, Bash, and PowerShell; published versioned artifacts for repeatable downstream deployment.
- Integrated Liquibase validation and update stages for Snowflake schema changes, maintaining migration history, explicit rollback scripts, and reviewed environment promotion.
- Provisioned Azure infrastructure through Terraform and ARM templates and deployed containerized services to AKS with Helm and ArgoCD.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: Azure, Snowflake, Liquibase, GitHub Actions, Jenkins, Python, JFrog, Terraform, AKS

- Developed Python FastAPI integrations for Jenkins, Jira, and JFrog to automate onboarding and reduce manual coordination of release activities.
- Delivered CI/CD automation for SaaS services and payment-platform workloads, aligning application releases, database dependencies, and infrastructure changes.
- Built Terraform modules for Azure networking and AKS, standardized Helm deployments and Ansible configuration, and used Prometheus and Grafana to support incident diagnosis.
- Partnered with developers and data engineers on Liquibase changesets for Snowflake tables and views, reviewing SQL, application compatibility, deployment order, and recovery plans.
- Standardized GitHub Actions and Jenkins workflows for build, test, artifact publication, and environment promotion, integrating SonarQube and secure secrets handling.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray, maintaining reusable shared libraries and consistent artifact versioning.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Azure, Snowflake, Liquibase, Jenkins, ARM templates, Ansible, PowerShell, Helm

- Packaged Kubernetes services with Helm and used ELK, Azure Monitor, and Log Analytics to troubleshoot deployment and application failures.
- Built Jenkins and Maven delivery pipelines for REST microservices across test, security-validation, UAT, and production environments.
- Automated Azure virtual machines, virtual networks, and Linux configuration with ARM templates, Ansible, and PowerShell; managed Key Vault integration and secure database connectivity.
- Coordinated Liquibase database changes and Snowflake SQL deployments with developers and QA, documenting migration order, role requirements, environment configuration, and verification steps.

DevOps Engineer | **Mphasis Ltd** 08/2016 - 12/2018

Client: HPE

Skills Used: Azure, Snowflake, Liquibase, Git, Terraform, ARM templates, Ansible, Python, SQL

- Created repeatable build and deployment pipelines for API, database, and UI components, promoting consistent artifacts across development and production.
- Managed build agents, release parameters, and deployment documentation, troubleshooting failed releases with development and operations teams.
- Automated Azure infrastructure with Terraform and ARM templates and application deployments with Ansible, Python, and PowerShell, keeping configuration consistent across environments.
- Maintained Git branching practices and Liquibase changelogs for Snowflake schema changes, versioning SQL and environment configuration to improve release traceability.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
