rajendranalakurthi.github.io

Lead DevOps Engineer | AWS Cloud, DevOps, SRE & Kubernetes with a base resume tailored toward **cloud, aws, azure, data, part, systems, integration, team**. Proven background across AWS, EKS, Terraform, CloudFormation, Jenkins, GitHub Actions with emphasis on measurable platform, delivery, and infrastructure outcomes. **Target emphasis:** storage, gcp, ntt, strives.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

KEY PLATFORM ACHIEVEMENTS

- Release Engineering** Directed enterprise release orchestration, build automation, change governance, and deployment troubleshooting across AWS, Kubernetes, and mission-critical application platforms.
- DevSecOps & Governance** Integrated security scanning, policy-driven controls, IAM, MFA, and secure network patterns into CI/CD and cloud operations to strengthen delivery governance and compliance.
- Kubernetes Platforms** Delivered containerized workloads on EKS, OpenShift, Rancher, and self-managed Kubernetes environments using Helm, ArgoCD, and repeatable manifest-driven workflows.
- AWS Platform Engineering** Designed AWS-first infrastructure with Terraform, CloudFormation, and Ansible to standardize provisioning, improve repeatability, and support secure multi-environment delivery.
- Observability** Implemented CloudWatch, Prometheus, Grafana, Splunk, ELK, and custom telemetry pipelines to improve platform visibility, incident response, and operational diagnosis.

CORE TECHNOLOGIES

INFRASTRUCTURE AS CODE

Terraform, CloudFormation, Ansible, Packer, YAML pipelines, AWS CLI

CLOUD PLATFORMS

AWS, Linode, multi-account landing zones, VPC, Transit Gateway, VPN, Direct Connect, Route 53, ALB, NLB, CloudFront

CONTAINERS & ORCHESTRATION

Docker, Docker Swarm, ECS, Kubernetes, Helm, Istio, Consul

SCRIPTING & PROGRAMMING

Shell, Batch, Python, PowerShell, .NET (C#), Core Java

BUILD TOOLS

ANT, Maven, MSBuild, Make, Gradle

DATABASES & RELEASE TOOLS

MySQL, PostgreSQL, MongoDB, Amazon RDS, Amazon Aurora, Liquibase, JFrog, SonarQube, Fortify, Black Duck

MANAGED KUBERNETES

EKS, OpenShift, Rancher, self-managed Kubernetes, hybrid Kubernetes

CI/CD PLATFORMS

Jenkins, GitHub Actions, GitLab CI, AWS CodePipeline, AWS CodeBuild, AWS CodeDeploy, CloudBees, ArgoCD

MONITORING & LOGGING

Amazon CloudWatch, CloudTrail, Grafana, Prometheus, AppDynamics, Splunk, ELK, Fluentd, InfluxDB

OPERATING SYSTEMS

Linux, RHEL, Ubuntu, HP-UX, Windows Server 2012

SOURCE CONTROL & SCM

GitLab, GitHub, Bitbucket, Gerrit, Subversion, TFS

OTHER PLATFORMS

IIS, Apache Tomcat, JBoss, WebLogic, VMware ESXi, Vagrant, Hyper-V, Vault, datree.io, Amazon ECR

PROFESSIONAL EXPERIENCE

Lead DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, AWS CodePipeline, PowerShell, Terraform, EKS, GitHub Actions, Milvus, Helm, Databricks on AWS

- Established Git branching, approval, and artifact versioning standards and integrated DevSecOps controls into release workflows through secure secrets handling, Terraform validation, and pre-deployment policy checks across AWS environments.
- Designed and implemented scalable EKS and Terraform-based infrastructure to support high-throughput vector search platforms powered by Milvus and GPU-enabled workloads.
- Automated provisioning of Databricks environments on AWS across isolated accounts, standardizing network integration, IAM controls, and environment consistency.
- Directed end-to-end release management across multiple engineering teams by aligning schedules, dependencies, change windows, and risk mitigation plans.
- Supported Java and Node.js microservices on AWS, improving scalability, runtime stability, and production readiness for cloud-native applications.
- Containerized critical microservices and deployed them with Helm and Kubernetes manifests, ensuring consistent runtime behavior across lower and production environments.
- Architected and maintained scalable CI/CD pipelines using AWS CodePipeline, GitHub, and reusable deployment workflows to automate build, test, and release execution.
- Standardized deployment pipelines for AWS and hybrid environments, improving release consistency, auditability, and operational reliability.
- Automated platform operations with Python, Bash, and PowerShell to reduce manual effort and accelerate provisioning, support, and recovery workflows.
- Managed self-hosted runners, build agents, and distributed deployment infrastructure to optimize pipeline throughput across controlled compute environments.
- Implemented secure service connectivity using AWS PrivateLink, VPC endpoints, and private networking controls to protect sensitive application traffic.
- Delivered release communications, milestone reporting, and risk updates to engineering leadership and business stakeholders to keep delivery streams aligned.
- Authored technical documentation, deployment guides, and operational runbooks to improve knowledge transfer and support readiness.
- Produced solution diagrams, environment specifications, and architecture documentation to improve stakeholder alignment and implementation clarity.
- Coordinated incident response and production release support, minimizing downtime and accelerating service restoration during high-priority events.

Senior DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: AWS, GitLab CI, Terraform, Jira, Kubernetes

- Enforced SCM best practices and coached development teams on GitLab workflows, branch governance, and merge standards.
- Troubleshoot pipeline, container, and Kubernetes issues in partnership with development teams to accelerate delivery and reduce deployment failures.
- Administered Kubernetes clusters and deployed applications through pods, deployments, services, and core platform components.
- Improved Kubernetes release processes by standardizing deployment patterns, secure runner standards, controlled branch protections, container image validation, and pipeline checks across environments.
- Implemented GitLab CI best practices, including reusable templates, pipeline governance, and controlled branch-based execution.
- Managed Docker image build, provisioning, and runtime administration to standardize containerized delivery workflows.
- Deployed and administered self-hosted and auto-scaling build agents for Linux and Windows workloads to support high-throughput CI/CD operations.
- Created package views, artifact feeds, and upstream repository strategies aligned to application team delivery requirements.
- Configured agent pools, runner templates, and execution policies to improve build reliability and reduce manual pipeline support.
- Migrated Jenkins pipelines to GitLab CI and modernized runner configuration to improve maintainability and pipeline reliability.

Senior DevOps Engineer II | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Linode, Python, Terraform, EKS, GitHub Actions, GitLab

- Provisioned AWS infrastructure using CloudFormation, Terraform, and pipeline-driven infrastructure-as-code deployment patterns.
- Established and maintained CI/CD pipelines with Jenkins, Git, Amazon ECR, and Kubernetes for repeatable application delivery.
- Drove continuous integration and continuous delivery practices using Git, Maven, Jenkins, Ansible, Docker, Kubernetes, and AWS services.
- Implemented disaster recovery, backup, and observability controls using AWS Elastic Disaster Recovery, AWS Backup, and Amazon CloudWatch.
- Deployed and configured self-hosted runners and build agents for Linux and Windows workloads supporting CI/CD and release automation.
- Implemented GitHub Actions workflows for deploying services to Kubernetes clusters across multiple environments.
- Published versioned artifacts to enterprise repositories and package managers to support downstream engineering consumption and traceability.
- Designed secure VPC networking, Route 53 DNS, security groups, load balancing, VPN connectivity, Direct Connect, and traffic-routing patterns for enterprise workloads.
- Built dashboards for CI/CD pipelines, work items, and defect tracking to improve engineering visibility and release governance.
- Integrated delivery tooling with Slack, Microsoft Teams, Jenkins, GitHub, and SonarQube based on engineering and audit requirements.
- Authored PowerShell and shell automation scripts and published them to shared repositories for consistent reuse across environments.
- Troubleshoot build and release pipeline failures and resolved deployment issues across distributed engineering teams.
- Built Docker images and deployed containerized applications to EKS using Helm charts and Kubernetes manifests.
- Deployed Kubernetes microservices through ArgoCD-based GitOps workflows.
- Configured deployment groups and environment-specific release targets to streamline controlled production rollouts.

Senior DevOps Engineer / Senior SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: AWS, Python, Jenkins, GitHub Actions, SonarQube, JFrog, Terraform, Kubernetes, Prometheus, Ansible

- Designed CI/CD pipelines for application and infrastructure deployments across AWS environments.
- Implemented MFA, identity access controls, and role-based access management for users and groups across cloud environments.
- Applied platform engineering best practices to improve reliability, scalability, and operational efficiency across shared services.
- Designed and delivered a Terraform and Kubernetes solution for payment-platform deployments, enabling repeatable infrastructure provisioning and container orchestration.
- Authored and enforced custom policy controls aligned to internal security and governance requirements across AWS accounts.
- Partnered with peers to isolate product defects and participated in retrospectives with development teams and sprint managers to improve release quality.
- Standardized GitHub Actions-based CI/CD patterns to accelerate software delivery and reduce pipeline drift across teams.
- Automated onboarding of new projects to the enterprise DevOps platform through API-driven workflows.
- Authored Helm charts to deploy containerized applications consistently across Kubernetes environments.
- Developed internal APIs in Python FastAPI to integrate Jenkins, Jira, and JFrog processes with platform automation.
- Created architecture and resource diagrams to support compliance reviews, security sign-offs, and controlled release execution.
- Developed custom Prometheus exporters in Python to capture application-specific operational metrics for SRE use cases.
- Administered CloudBees Jenkins, JFrog Artifactory, and Xray enterprise tooling for secure software delivery.
- Built resilient Ansible roles and playbooks to deploy highly available Grafana, Prometheus, and Node Exporter monitoring stacks.
- Developed Jenkins shared libraries to automate image versioning and publish artifacts to private JFrog repositories.

Senior DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: Kubernetes, AWS, Ansible, GitHub, Shell Scripting, Jenkins, Maven, Tomcat, JBoss, Helm

- Worked extensively with AWS infrastructure services including EC2, CloudWatch, Secrets Manager, and managed database platforms for enterprise workloads.
- Represented the DevOps team and presented CI/CD and infrastructure automation strategies for key engineering initiatives, including Model Finder.
- Supported enterprise applications on AWS by troubleshooting CloudWatch, Amazon RDS, load balancing, auto scaling, certificate management, CloudFront, and identity integrations.
- Automated fleet-level configuration enforcement for Linux and Windows EC2 instances and managed secure access and database connectivity in line with enterprise security standards.
- Built Kubernetes environments with pods, deployments, services, and ConfigMaps, and managed Helm-based release packaging for multi-namespace workloads.
- Built continuous delivery pipelines and supported REST-based microservices deployments across Demo, Test, Pentest, Training, CTDEV, Sandbox, UAT, and PROD environments.
- Designed monitoring architecture to collect application, infrastructure, and platform metrics using the ELK stack.
- Integrated on-premises identity sources with cloud access controls and strengthened security using privileged access, identity protection, and MFA.
- Deployed Kubernetes manifests to on-premises clusters with Helm and standardized release packaging across services.
- Used CloudFormation and PowerShell scripting to provision and manage cloud resources in a repeatable and auditable manner.
- Tuned scaling policies and service capacity for application and database workloads during on-premises to AWS migration programs.
- Planned and executed migration strategies for traditional workloads to AWS using lift-and-shift and modernization approaches.
- Supported migration of on-premises Windows Server workloads to AWS and validated post-migration configuration through structured cutover and failover testing.
- Led platform review discussions with stakeholders in Germany to present roadmap enhancements and quarterly DevOps priorities.
- Served as acting scrum master by managing stories, epics, sprint commitments, and core scrum ceremonies.

DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: AWS, Chef, Ansible, GitLab, Shell Scripting, Python, Maven, Tomcat, JBoss, Splunk, Nexus

- Created CI/CD pipelines for multiple application components across shared delivery platforms.
- Built YAML-based build and release pipelines with event-driven triggers to support continuous integration on every code change.
- Executed Terraform deployments through pipelines and promoted the same artifact set across multiple environments through controlled environment selection.
- Authored and maintained Terraform modules and executed infrastructure changes through automated CI/CD workflows.
- Built and managed self-hosted build agents to support pipeline execution at scale.
- Managed variable groups and environment-specific configuration to separate deployments cleanly across stages.
- Executed AWS proof-of-concepts and delivered solution designs aligned to application and infrastructure requirements.
- Defined and implemented branching strategies for Git repositories to improve release governance and code promotion.
- Documented build and deployment flows for core infrastructure, API, database, and UI components to improve team consistency.
- Created deployment pipelines with Ansible to promote releases from development through production in a controlled, repeatable manner.
- Authored AWS CLI automation to update service configurations and standardize administrative operations.

EDUCATION

B.Tech (2009-2013) in Information Technology

Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
