rajendranelakurthi.github.io

Lead AWS DevOps Engineer with more than a decade of enterprise cloud, CI/CD, infrastructure automation, platform engineering, and production-operations experience. Deep hands-on expertise with **AWS, Terraform, CloudFormation, Jenkins, GitLab CI/CD, CodePipeline, CodeBuild, CodeDeploy, Python, Bash, Ansible, Linux, Docker, Kubernetes, EKS, ECS, ECR, IAM, VPC networking, and CloudWatch.**

Proven in designing secure and scalable AWS platforms, modernizing delivery toolchains, automating application and infrastructure releases, implementing hybrid connectivity, leading platform upgrades, troubleshooting complex operational failures, and aligning development, infrastructure, operations, network, database, and security teams around reliable enterprise delivery.

CERTIFICATIONS

GitLab Certified Associate

Microsoft Certified: Azure Fundamentals

Microsoft Certified: Azure DevOps Engineer Expert

AWS Certified Solutions Architect - Associate

MuleSoft Certified Developer - Level 1

AWS DEVOPS ENGINEERING HIGHLIGHTS

- AWS Platform Engineering** Designed secure, scalable, highly available AWS platforms using reusable Terraform and CloudFormation patterns across enterprise environments.
- CI/CD Leadership** Built application and infrastructure delivery pipelines with Jenkins, GitLab CI/CD, CodePipeline, CodeBuild, and CodeDeploy, including quality, security, approval, and rollback controls.
- Cloud Security** Implemented least-privilege IAM, role-based access, security groups, secrets controls, private networking, auditability, and policy-driven delivery guardrails.
- Automation & Modernization** Automated provisioning, configuration, deployments, platform upgrades, and operational workflows with Python, Bash, Ansible, Terraform, CloudFormation, and AWS APIs.
- Reliability & Observability** Improved production reliability through CloudWatch, Datadog, Splunk, ELK, dashboards, alerting, root-cause analysis, incident response, and continuous improvement.

CORE TECHNOLOGIES

AWS CLOUD

EC2, ECS, EKS, ECR, Lambda, S3, RDS, Aurora, DynamoDB, OpenSearch/Elasticsearch, SNS, SQS, Route 53, CloudFront

CI/CD

Jenkins, GitLab CI/CD, AWS CodePipeline, CodeBuild, CodeDeploy, Git, reusable pipelines, approvals, artifacts, promotion, rollback

INFRASTRUCTURE AS CODE

Terraform, reusable modules, CloudFormation, Packer, remote state, plan/apply governance, policy validation

AWS SECURITY

IAM roles and policies, least privilege, security groups, KMS, Secrets Manager, Parameter Store, CloudTrail, Config, access controls

AUTOMATION

Python, Bash, Shell, SQL, PowerShell, Perl exposure, AWS CLI, AWS SDKs and APIs, YAML, JSON

CONFIGURATION & ORCHESTRATION

Ansible, Puppet, Rundeck, Terraform, CloudFormation, server configuration, patching, deployment orchestration

CONTAINERS

Docker, Kubernetes, EKS, ECS, ECR, Helm, container build, scanning, deployment, and runtime operations

NETWORKING & HYBRID CLOUD

VPC, subnets, route tables, ALB/ELB/NLB, Transit Gateway, VPN, Direct Connect, PrivateLink, endpoints, DNS, on-premises connectivity

MONITORING & LOGGING

Amazon CloudWatch, Datadog, Splunk, ELK, Sumo Logic, CloudTrail, Grafana, Prometheus, logs, metrics, alerts

LINUX & DATA

Linux, Unix, RHEL, Ubuntu, shell administration, MySQL, PostgreSQL, RDS, Aurora, DynamoDB, MongoDB

PROFESSIONAL EXPERIENCE

Lead AWS DevOps Engineer | AT&T Services Inc.

08/2023 - Present

Skills Used: AWS, Terraform, CloudFormation, Jenkins, GitLab CI/CD, CodePipeline, CodeDeploy, Python, Bash, Ansible, EKS

- Led AWS DevOps engineering across application and infrastructure delivery, defining platform standards, automation roadmaps, reusable patterns, security controls, reliability practices, and upgrade strategies for enterprise teams.
- Architected multi-stage CI/CD pipelines with Jenkins, GitLab CI/CD, AWS CodePipeline, CodeBuild, and CodeDeploy for build, test, security scanning, artifact publication, approvals, deployment, validation, and rollback.
- Developed reusable Terraform modules and CloudFormation templates for VPCs, IAM, security groups, EC2, EKS, ECS, ECR, load balancers, databases, storage, messaging, monitoring, and private connectivity.
- Implemented secure Terraform delivery with remote state, locking, plan review, controlled apply stages, policy validation, reusable modules, environment separation, and least-privilege execution roles.
- Established AWS security best practices using IAM roles and policies, permission boundaries, security groups, KMS, Secrets Manager, CloudTrail, AWS Config, private subnets, and auditable access controls.
- Automated provisioning, deployments, configuration, health checks, platform upgrades, and recovery workflows using Python, Bash, Shell, Ansible, AWS CLI, SDKs, APIs, YAML, and JSON.
- Designed hybrid connectivity across AWS and on-premises environments using VPC routing, Transit Gateway, VPN, Direct Connect, PrivateLink, endpoints, DNS, ALB, NLB, and security controls.
- Built and operated Docker and Kubernetes workloads on EKS and ECS, integrating ECR image workflows, Helm deployments, autoscaling, health checks, secrets, and deployment strategies.
- Implemented operational visibility with CloudWatch metrics, logs, alarms, dashboards, CloudTrail, Datadog, Splunk, ELK, and Sumo Logic patterns to accelerate detection and root-cause analysis.
- Coordinated development, operations, infrastructure, network, database, and security teams to troubleshoot production issues, remove delivery bottlenecks, and drive measurable DevOps improvements.

Senior AWS DevOps Engineer | GlobalLogic

03/2023 - 08/2023

Skills Used: AWS, Jenkins, GitLab CI/CD, Terraform, Ansible, Docker, Kubernetes, Python, Linux

- Built and maintained CI/CD pipelines for application, container, database, and infrastructure delivery across multiple AWS environments.
- Provisioned AWS services with Terraform and CloudFormation and standardized reusable modules, naming, tagging, variables, outputs, and security defaults.
- Administered Linux build agents and deployment infrastructure and resolved pipeline, credential, dependency, network, artifact, and environment failures.
- Automated server configuration and release orchestration with Ansible, Python, Bash, and Rundeck-style runbooks to reduce manual operational effort.
- Integrated pipeline quality gates, image scanning, IAM controls, approvals, monitoring checks, and rollback procedures for dependable production delivery.

Senior AWS Platform Engineer | Akamai Technologies

12/2021 - 03/2023

Skills Used: AWS, Terraform, EKS, GitHub Actions, GitLab, Python, CloudWatch, Docker

- Provisioned AWS infrastructure through reusable Terraform modules and pipeline-driven infrastructure-as-code deployment patterns.
- Delivered containerized microservices to EKS using Docker, ECR, Helm, Kubernetes manifests, environment promotion, and automated verification.
- Implemented AWS networking and security controls spanning VPCs, subnets, security groups, IAM, private endpoints, load balancers, and hybrid connectivity.
- Automated cloud operations and deployment support with Python and Bash and integrated AWS APIs for provisioning, status, and recovery workflows.
- Built CloudWatch dashboards, alarms, logs, backup, and disaster-recovery controls and led root-cause analysis for platform and deployment failures.

Senior AWS DevOps / SRE | Turvo India Pvt Ltd

04/2020 - 12/2021

Skills Used: AWS, Jenkins, Terraform, Ansible, Kubernetes, Prometheus, Grafana, Splunk, Python

- Designed CI/CD pipelines and Terraform automation for scalable AWS application and infrastructure deployments.
- Applied SRE practices to deployment reliability through health gates, monitoring, alerting, incident response, capacity analysis, and rollback readiness.
- Implemented observability with CloudWatch, Prometheus, Grafana, Splunk, and ELK to correlate infrastructure, application, and deployment signals.
- Automated fleet configuration, patching, deployment, and operational validation with Ansible, Python, Bash, and reusable runbooks.
- Troubleshoot distributed application, container, network, database, and cloud-service issues and converted findings into durable platform improvements.

Senior AWS DevOps Engineer | HCL Technologies

02/2019 - 04/2020

Client: Mercedes-Benz Research & Development India

Skills Used: AWS, Jenkins, Ansible, Terraform, Docker, Kubernetes, Bash, Linux, ELK

- Built Jenkins delivery pipelines for Java and microservices workloads across development, test, UAT, and production AWS environments.
- Automated AWS infrastructure and Linux server configuration with Terraform, CloudFormation, Ansible, Bash, and PowerShell.
- Deployed Docker and Kubernetes workloads with repeatable packaging, configuration, secrets, health checks, and environment promotion controls.
- Implemented monitoring and log analysis with CloudWatch and ELK and supported production releases, incident response, and service restoration.
- Improved hybrid networking, application connectivity, security groups, load balancing, and operational documentation across cloud and on-premises systems.

AWS DevOps Engineer | Mphasis Ltd

08/2016 - 12/2018

Client: HPE

Skills Used: AWS, Jenkins, Terraform, CloudFormation, Ansible, Python, Bash, SQL, Splunk

- Created Jenkins pipelines for build, test, packaging, infrastructure provisioning, deployment, and controlled promotion across AWS environments.
- Authored reusable Terraform modules and CloudFormation templates and executed infrastructure changes through automated CI/CD workflows.
- Automated Linux administration, server configuration, deployments, file handling, and operational checks using Python, Bash, Shell, Ansible, and SQL.
- Supported EC2, load balancing, storage, relational and NoSQL databases, messaging, monitoring, logging, and access-control services.
- Diagnosed build, deployment, network, server, database, and production issues and maintained repeatable runbooks and recovery procedures.

EDUCATION

B.Tech (2009-2013) in Information Technology
Prakasam Engineering College, Jawaharlal Nehru Technological University, Kakinada
